Although the cattle market looks promising for the future, several variables are still lurking on the horizon.

Cattle market future looks promising

By MELISSA PIPER

LANCASTER - Although he cattle outlook for the icentennial year still emains a "confusing ituation", an overall view hows improvement in the ndustry but without a izeable increase in profit, ccording to Lou Moore, Penn State extension economist.

Moore delivered his forecast at the annual Cattle Feeders Day held at the Farm and Home Center here on Tuesday.

Early 1976 reports have shown that cattle on feed are up 28 percent in 23 leading states including Pennsylvania, according to the economist, with the total cattle slaughter to be up about 10 percent.

"Feeder cattle prices should be a little higher about spring," Moore noted, "when pastures turn green, producers are going to be competing for steers to fatten out while now only packers are bidding for the animals."

Moore told the producers that 1975 had been a "disaster" for the cow-calf operations but the feeders had in general made money because of the low number of cattle on market.

"Feed prices came down and a lot of feeders made money," he explained, "which wasn't exactly what we had predicted."

However with the price margins squeezed more this year, producers may not experience the profits realized in 1975.

Commenting on hedging, Moore cautioned the producers as there was not much "optimism" indicated for this year. "Hedging potentials are too close to

Area tobacco averages 58 cents per pound

LANCASTER - As of Thursday afternoon, about one-tenth of Lancaster County's tobacco crop had been purchased for an average price of 58 cents per pound. "Some went for a little less and some for a little more," said a spokesman for the A.K. Mann Tobacco Co., here, who went on to describe this year's crop as not being as uniform as last year's but comparable to last year's in quanitity.

Tobacco buying is going on strong, but several companies are still inactive, leaving less than a half dozen bidders in a market which perennially keeps growers and buyers haggling. As far as growers are concerned, there's also a lot of guessing.

This year's crop is turning out to be "mixed" - meaning that there is a lot of good tobacco in the area, but also some which is damaged or not first rate in other quality criteria. Most of the County's crop is used in the manufacture of cigars and chewing tobacco.

Tobacco buyers have been out scouting around for over two weeks, but it wasn't until about a week ago that the first few purchases were made - and then only a few. Early reports indicate that the highest price paid so far was 63 cents a pound. The highest quality tobacco such as this is likely to go into cigarettes - a very small portion of the market in this area, according to the A. K. Mann Company.

Most of the tobacco purchased so far has been of better quality, so it remains to be seen what sort of prices will be paid for the leaves which are still hanging in tobacco sheds. According to Arnold Lueck, Lancaster County assistant extension agent, the market is very unpredictable.

So far the average price paid (58 cents) is identical to

Lancaster Auction sees volume increase

By MELISSA PIPER

LANCASTER - At a time when many livestock auctions are experiencing low measurable receipts and even less profit, the large stockyard complex situated near the city here has seen a steady growth since 1972.

William McCoy, president of the Lancaster Stockyards, recently announced that since 1974, his market had realized a 23.2 percent increase in saleable receipts. One of the few such complexes in the east, the market according to McCoy has seen "a good rate of growth."

In the past year the percentages of livestock flowing through the stockyards has been on the increase except for sheep which declined by 17 percent in the past year. Veal calf receipts were up 35 percent with total cattle numbers up 19.4 percent. Slaughter hogs were up 4 percent with the largest and most outstanding increase being in the feeder pig division. An increase of 325 percent in feeder pigs has been the overwhelming figure in growth.

McCoy noted that the sharp increase had been helped by the increased sales of feeder pigs which now takes place every other week instead of once a month. Weekly feeder cattle sales have also sparked growth for the concern.

The complex, located on the corner of Marshall Avenue and the Lititz Pike, is a beehive of activity almost every day. Unlike many auctions which operate once or twice a week, the complex is being used as much as possible. "We have been trying to create an active atmosphere every day," McCoy explained.

"Increasing our sales and adding more auctions has stimulated interest."

The stockyard president, explained that many farmers liked the idea of direct sales through bonded commission firms, as are offered at the complex rather then selling in by other means.

"Farmers seemed con-

Local Grain

Friday, Jan. 30

These prices are made up of the average prices quoted by a number of participating area feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

		Bid Offered+
Ear Corn	60.50	66.50
Shelled Corn	2.59	2.80
Barley	1.92	2.13
Oats		
Western	1.83	2.02
Local	1.50	1.74
Wheat	3.02	3.11
Soybeans	4.60	—

Soybean Meal - *no prices given.*

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

PROGRESSIVE FARMERS WANT PROFESSIONAL CONSULTATION

1. Is pH a false indicator of calcium levels in your soils?
2. Is sulphur holding back the yield, protein content and adjustability of your crops?
3. Is excessive magnesium what makes your land so wet and late?

If your present soil tests don't answer these questions, you will profit by our technical help. SOIL TESTS ARE DIFFERENT! Our **complete** soil analysis will help you **balance** soil fertility, which means more efficient cropping and feeding - less bought feed and fertilizer - more yield and profit.

WE SELL NO PRODUCTS — ONLY RECOMMENDATIONS

There is a reason why progressive farmers with sharp pencils hire us year after year for soil analyses and recommendations. We save them dollars. **Balance** makes crops to be proud of. Winter is the time to talk it over with:

Prices paid at farm:

Light type hens 8-1 mostly 10½-11 in Pa., most 9-10 in NJ.

Heavy type hen TFEWR.

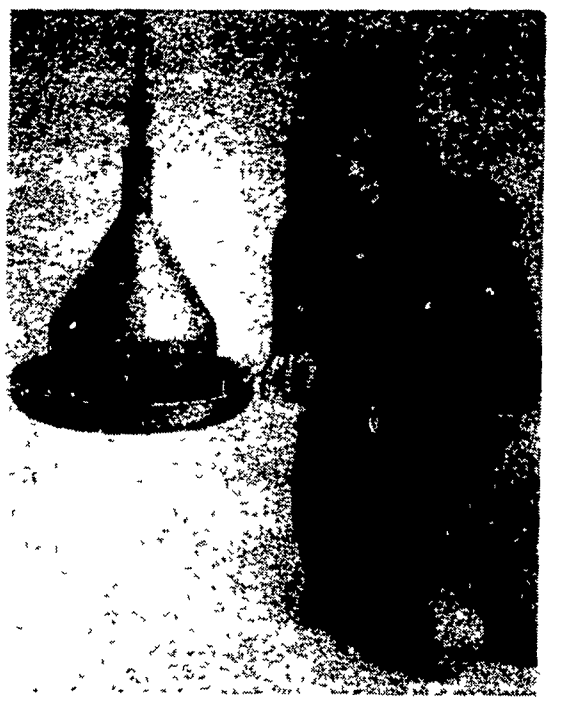
BEC

PUT WATER WHERE IT'S NEEDED

WATERMASTER 3

Moulded from polyethylene for ease of cleaning and maximum life. The Watermaster 3 has been designed for use by broilers, pullets, layers and turkeys from day-old onwards.

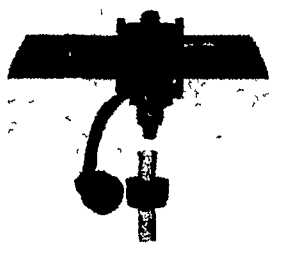
The special anti-perch shape prevents birds from fouling the drinker and in this, the big brother of the world renowned Watermaster 2, the 15 in diameter offers greater drinking space. The valve system is extremely simple to ensure continuous water supply. The large flat filter is easily removed for cleaning and all fittings are self-sealing with no 'O' rings or washers needed. Watermasters are supplied complete with the BEC saddle connector, 10ft. of tubing and suspension. The recommended stocking rate is 10 to 14 waterers per 1000 birds.



The specially designed protective ring for day-old birds is ideal for turkeys, breeding stock and rearing pullets. The water ballast gives excellent stability without making waterers too heavy to handle.

The Bec 75 Waterer:

1. Takes up less room in the house-more room for the birds
2. It is distribution that counts - more drinking points, for the same money, means that the birds have less distance to walk to water
3. Lighter and more convenient to handle and clean
4. At the end of the crop, easy to empty house - one person can carry 50 to 100 waterers
5. Easy Connections a) Saddle connector (see inset) b) Tube fittings (see inset) c) new easy method of raising and lowering the waterer with hanger box



Saddle Connector

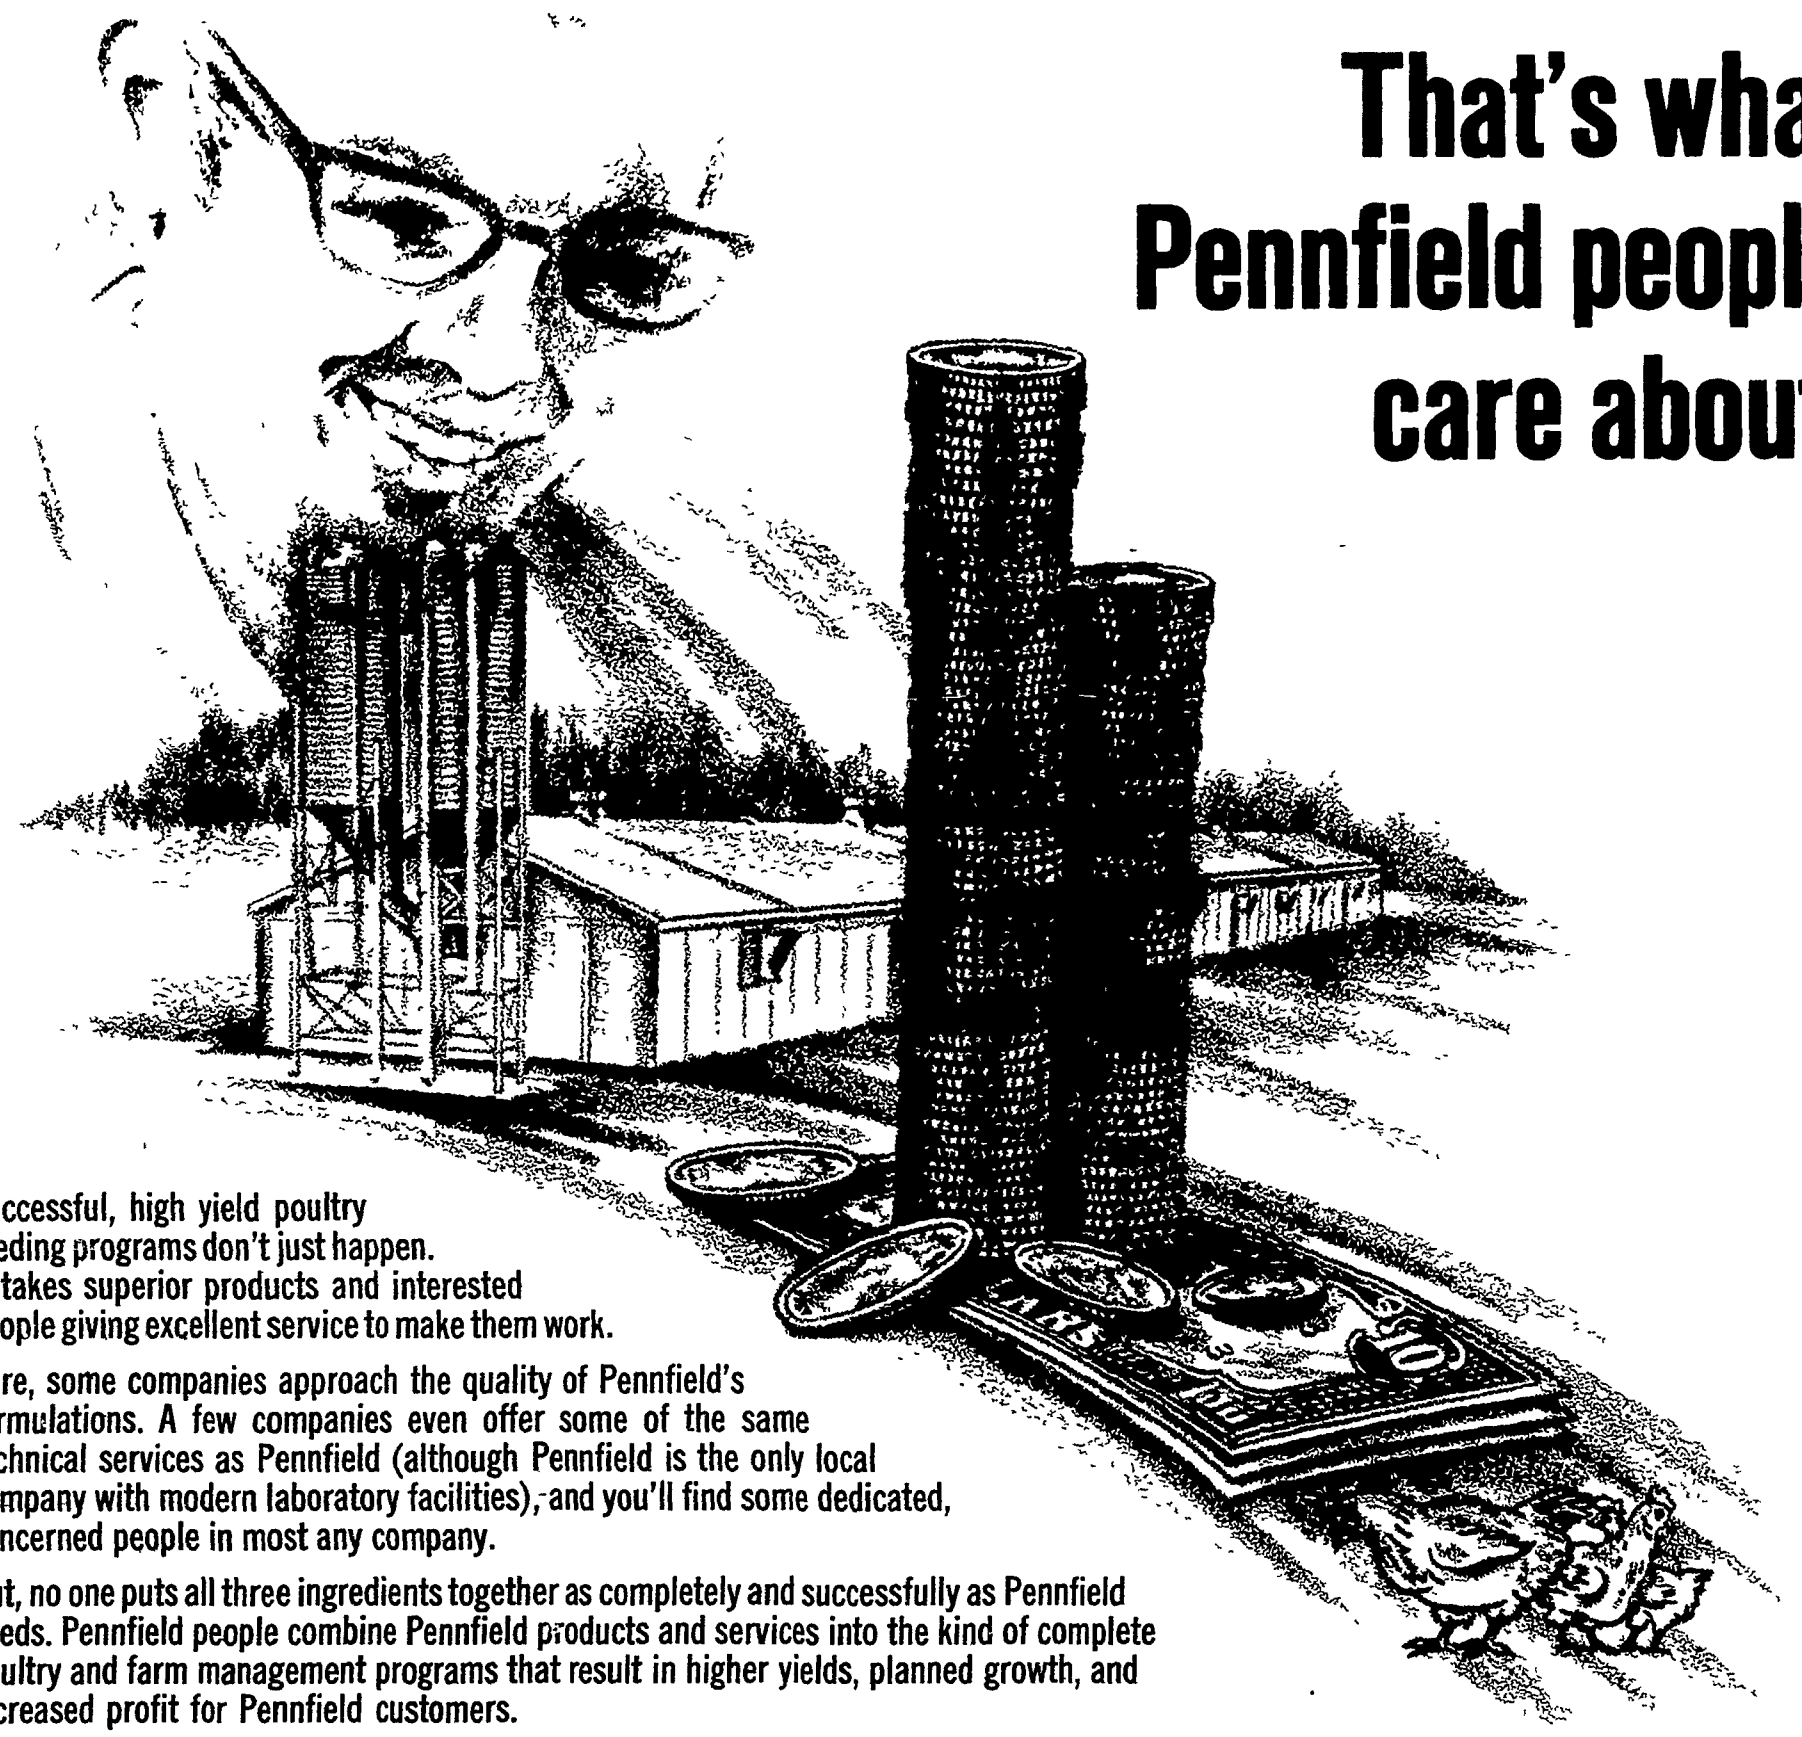
Your POULTRY PRODUCTIVITY, your PROFITABILITY.



That's what Pennfield people care about.

Successful, high yield poultry feeding programs don't just happen. It takes superior products and interested people giving excellent service to make them work.

Sure, some companies approach the quality of Pennfield's formulations. A few companies even offer some of the same technical services as Pennfield (although Pennfield is the only local company with modern laboratory facilities), and you'll find some dedicated, concerned people in most any company.

But, no one puts all three ingredients together as completely and successfully as Pennfield Feeds. Pennfield people combine Pennfield products and services into the kind of complete poultry and farm management programs that result in higher yields, planned growth, and increased profit for Pennfield customers.

Chemists, nutritionists, production personnel, veterinarians, computer technicians, business and marketing analysts, deliverymen, quality control specialists, financial experts, and more . . . led by your Pennfield Area Manager who can put them all together to develop and service a customized, profit-oriented program for you. These are Pennfield people. And, Pennfield people make Pennfield Feeds a better buy.

Want to know how Pennfield people can work for you to improve your yields and profit? Complete and mail this coupon for a no obligation survey.

Omaha Cattle

January 29
Weekly 51
Cattle

Compared previous week's close —

Slaughter steers 2.00-2.50 lower through midweek with Choice and Prime predominantly yield grade 4 often sharing full downturn although late supplies insufficient to reflect improved carcass trade. Heifers 1.50-2.00 lower. Cows 1.00-1.50 higher and bulls firm to 1.00 higher.

Four day receipts 13,100 as compared 15,900 previous week and 22,000 a year ago. Steers approximately 37 pct. of week's total and heifers 32 pct, fairly liberal percentage Choice included although many cattle still carried at least a moderate amount of mud. Fed cattle trade again under severe downward pressure forepart of week in reaction to continued sluggish conditions surrounding wholesale carcass trade. Fresh downturns pushed carcass prices some 14.00-16.00 below early December 1975 and left live prices at the lowest point since March 1975. After initial session, however, seller resistance stiffened as prices fell near the "break even" point or below and late marketings were reduced to little more than 50 percent of normal. Buyers again selective for yield grade with some interests avoiding as much as possible consignments carrying a substantial percentage of yield grade 4.

STEERS: Two loads Choice and Prime 1175-1234 lbs. yield grade 3-4 39.25-39.50 early. At midweek, three loads Choice and Prime 1095-1269 lbs. yield grade 3-4 38.50-38.75. Choice 975-1250 lbs. yield grade 2-4 relatively clean closed 37.50-38.50, some mostly Choice muddy 37.00-37.25. Mixed Good and Choice 950-1225 lbs. 36.25-37.50. Good 34.50-36.50. Standard and low-Good 33.00-34.50.

Average of LS-214, detailed quotations, for Choice 900-1100 lb. steers this week 38.12; Choice 1100-1300 lbs. 38.25.

HEIFERS: Couple small consignments Choice and Prime 38.00 early, few loads same grade 975-1050 lbs. yield grade 3-4 37.00. Choice 850-1050 lbs. yield grade 2-4 closed 36.00-37.00, many carrying at least a moderate amount of mud. Mixed Good and Choice 750-1000 lbs. 34.00-36.00. Good 30.00-34.00. Small lots Standard and Good 27.00-29.00.

COWS: Utility and Commercial 23.00-26.00, few high-Utility and Commercial 26.50-27.00. Canner and cutter 18.00-23.00, mixed cutter and low-Utility 23.25-23.50. Shelly canner 16.00-17.50.

BULLS: Yield grade 1&2 1400-1800 lbs. 23.50-29.00, individual yield grade 1 30.00-31.00.

East Coast Carlot Meats

Wednesday, Jan. 28

Compared to Tuesday's close: Choice steer beef and good heifer beef steady to 1.00 higher. Good steer beef steady to 50 lower. No sales cow beef or lamb carcass reported. Olde Homey Hints

To restore faded colors, the spots were rubbed with hartshorn and placed in the sun to dry.

Ag-safety Tip

Members of farm and ranch families are the most susceptible to agricultural accidents, analysis of farm accident statistics by Sperry New Holland reveals. Some 89 percent of all farm and ranch accidents happen to family members, while eight percent to employees and three percent to guests and visitors.

TRY A CLASSIFIED

THE OLD FARMER'S ALMANAC

FEB. 2-8, 1976

Wintry boughs against a wintry sky.

Don't forget to feed the birds Charles Lindbergh born Feb 4, 1903 First quarter of the moon Feb 8 Groundhog Day Feb 2 (If fair and clear, two winters this year) Average length of days for the week, 10 hours, 6 minutes American Episcopal Church founded Feb 4, 1887 Shoe rationing began Feb 7, 1943 *Tradition this year doth report that maidens are allowed to court*

Old Farmer's Riddle: Why are lazy people's beds always too short for them? (Answer below)

Ask the Old Farmer: I recall that my New England-born grandmother occasionally prepared an item called "keach cakes" many years ago Have you ever heard of these and, if so, how are they made? T G B, Washington, D C

No more than flour pancakes The word "keach" means to scoop or ladle (picking up the batter, likely)

Home Hints: Make sure the pan you are using is big enough when cooking rice It swells three to four times its measure *Riddle answer:* Because they lie too long in them

OLD FARMER'S WEATHER FORECASTS

New England: Week is mostly sunny, cold and fair, except for some flurries midweek

Greater New York-New Jersey: Early week seasonably cold, some light snow; clear and very cold through weekend

Middle Atlantic Coastal: Sunny and seasonable to start, then some light rain, very cold, some light snow latter part

Piedmont & Southeast Coastal: Week begins rainy, snow inland, then sunny and cold, showers, then mostly sunny and cold at week's end

Florida: First few days cold and rainy, possible snow in northwest, then becoming fair and continuing cold; rest of week sunny and cold, few showers in south

Upstate N.Y.-Toronto & Montreal: Seasonable weather to start, sunny in central and east, then snow, intermittent light snow and cold latter part

Greater Ohio Valley: Light snow and very cold all week; intensely cold latter part

Deep South: Sunny and cold through midweek, then light rain, mixed with snow in north, latter part clear and cold, except warming by week's end

Chicago & Southern Great Lakes: Week begins with light snow, then extreme cold by midweek, partly cloudy, very cold and scattered flurries rest of week.

Northern Great Lakes: Partly sunny, light snow to start, general flurries latter part, and very cold in central and east, but moderating by week's end

Central Great Plains: North-east is very cold and snowy most of week, somewhat milder at week's end, mild with some flurries in west

Texas-Oklahoma: Early week clear and colder than normal, except in west, then some rain in southeast midweek, clear and warming over weekend

Rocky Mountain: Mostly sunny, dry, warming up in south and light rain or snow in north and west latter part.

Southwest Desert: Week begins fair and cool, then warming to above normal, clear and unseasonably warm latter part, cooler in west on weekend

Pacific Northwest: Beginning of week is rainy, then partly cloudy and dry by midweek, drizzle latter part turns to rain by end of week

California: Partly sunny and cool, some fog inland to start, then turning warm in south, rainy weekend, light snow in mountains

Berks County DHIA Monthly Report

Junge Farms' registered Holsteins were tops in the December DHIA herd averages last month - averaging 1.89 pounds of butterfat per cow per day.

The high individual record was produced by "Dandy," a seven-year old Holstein in the Ray E. Bicksler herd. She pumped out 25,362 pounds of milk and 872 of fat during her 305-day lactation.

The following is the Berks County DHIA Report for the month of December, 1975. Only those herds averaging 1.5 per day or over are listed.

AGRI-KING
KEY TO PROFIT

CONGRATULATES

EARL & BETTY WEIR

Cochranville, PA

for the excellent job they have done this past year in achieving the highest milk production record in Chester County for 1975 with a rolling herd average of 18,373 lbs. of milk.

Agri-King is proud to have had the privilege of working with Earl and Betty for the past three years and are looking forward to seeing them set new records in the future in Chester County.

Cattle numbers increased

HARRISBURG - Pennsylvania cattle feeders had 90,000 cattle and calves on feed for slaughter market at the beginning of the year according to the Crop Reporting Service. This was eight percent or 7,000 head more than were on feed a year earlier.

Marketings of fed cattle during the October-December quarter at 24,000 were eight percent or 2,000 head less than were marketed during the same period in 1974. There were 57,000 head placed on feed during the quarter, ten percent or 6,000 less than the same period a year ago. Expected marketings of fed cattle, if realized, during the January-March quarter at 28,000 would be eight percent or 2,000 head more than were marketed during the same period in 1975.

Cattle and calves on feed for slaughter market in the 23 major cattle feeding states totaled 12,296,000 head on January 1, 1976. This is up 28 percent from a year ago. Placements of cattle and calves in the 23 states during the October-December quarter of 1975 totaled 8.3 million head, up 27 percent from this period in 1974.

Marketings of fed cattle for slaughter during the October-December quarter of 1975 totaled 4.9 million head, down 11 percent from the same quarter a year ago. Expected marketings during January-March 1976 in the 23 major states is estimated at 6.2 million head and if realized, would be 12 percent above the first quarter of 1975.

Lancaster Farming

EDITORIAL COMMENTS

BY DIETER KRIEG, EDITOR

Diet books and pure bunk

Farmers already know this — and have for a long time — but some of their city cousins don't, and the following may serve as a bit of ammunition for them to use the next time they confront someone who is afraid to eat a good wholesome meal.

Dr. Michael DeBakey, the famed heart surgeon, supplies the welcome information and we cheer him for it.

DeBakey says steaks, eggs, bread, and potatoes are "good old fashioned foods" which are not going to fill us with cholesterol and kill us with coronaries." He was featured in a NATIONAL STAR newspaper story headlined "Go Ahead, Eat That Steak — It's Okay Says Top Heart Doctor."

We reprint a portion of his remarks in the next few paragraphs.

"There's nothing wrong with a person having an egg breakfast every morning," and there's nothing wrong with regular steak dinners. Eat nothing to excess — moderation is the key to a healthy diet.

"These restricted fad diets that tell people not to eat this or that or you will die of a heart attack are just pure bunk. From a medical point of view, we don't believe diet plays a particularly big role in heart attacks. I suspect that a lot of these fad diets that are filling up books are being written only for commercial reasons."

As acknowledged earlier, farmers already know this. But farmers sometimes don't carry the authoritative clout which a doctor has, and with this in mind, it might be well for farmers to grasp DeBakey's statements and shoot this info directly at those who are terrified at the sight of a good steak and tempting eggs.

Questionable information

The validity of USDA's market reports and similar projects have often been questioned. Farmers themselves admit from time to time that they have little faith in them and that they don't really feel like cooperating with USDA surveys — claiming that their production and intentions are none of the government's business.

USDA's effort in trying to portray Australia's meat industry really came into question at my desk in recent weeks because a USDA report and those from an Australian friend don't agree.

The USDA release, received here last month, states: "Australian cattle prices slumped sharply at country auctions in late November and could ease further in weeks ahead. Low prices are attributed to an early curtailment of shipments to the U.S., which halted imports in excess of the voluntary restraint level on Nov. 17 (1975). This resulted in an earlier than usual closing of Australian packing plants, which normally close for a period of time at the end of the shipping year."

My friend's letter, dated Nov. 15, 1975, reads, in part: "Cattle prices have improved considerable the last two months, but even now would not be up to the cost of production." A second letter, dated January 2, 1976, stated: "Cattle prices have about doubled in the last six months but would hardly cover the costs of production even yet."

Interested and active in the cattle business for a number of years here in Pennsylvania and more recently in the "Land Down Under" which he now makes his home, my Australian friend also reported that "The news about the increased quota for Australian meat this year to the U.S. has been joyful news to cattlemen here. A recent report from the Australian Meat Board says they have signed a contract with four shipping lines at a much better rate than last year.

One thing the USDA report and news from my friend agree on is that there's very little profit in the Australian cattle industry. In Queensland, for example, 20 per cent of all cattlemen supposedly had an income of less than $2,000 last year — which includes several hundred families, my correspondent wrote.

Earl Butz's PR effort

When U.S. Secretary of Agriculture, Earl Butz, stopped in York a week ago to address the 13th Annual Agribusiness Seminar - sponsored jointly by the York County Extension Service and the York Chamber of Commerce - he was talking to the wrong crowd. He himself admitted that because the "meat" of his talk was really not much more than a public relations effort

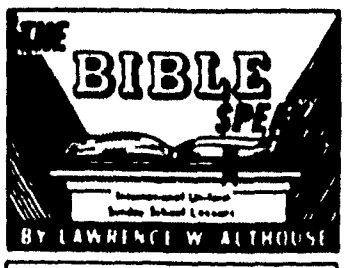
There's nothing wrong with that The talk was obviously entertaining, as frequent outbursts of laughter proved. While not revealing much of anything new regarding farm policies, he did present an educational talk. Educational to whom?

Farmers probably already knew most everything which Butz referred to in his half-hour presentation. (See text of his speech elsewhere in this issue) But some members of the Chamber of Commerce may not have been so well informed when it comes to agriculture and agribusiness. And it's a good bet that consumers aren't aware of the numerous facts Butz presented.

At least one radio station in the area taped Butz's speech and presented it to the public in its entirety. At least one TV station was present at the meeting, and the speech did receive some coverage in York newspapers.

So, while Butz's speech may not have amounted to a whole lot more than entertainment to farmers themselves, his message did get out to the public where it's needed as much as anywhere, if not more so. As Butz stated in his message, he has a PR job to do. I agree with that - and if his message enlightened a few housewives in this area, then his coming to York was very worthwhile.

American agriculture needs more recognition among the George - Meanys and Mrs. Butterworths. The responsibility of this undertaking lies not only on an agriculture secretary but on our news media and each individual farmer as well. It's a big job which everyone should share in.



"SOMETHING GREATER!"

Lesson for February 1, 1976

Background Scripture: Matthew 11 through 12.

Devotional Reading: 2 Corinthians 4:1-6.

The Hebrew faith current in the time of Jesus was a magnificent and impressive religious system. A considerable bumber of Roman soldiers stationed in Palestine were favorably impressed and drawn to this spiritual approach.

"What is lawful?"

Yet, it was a flawed system and the flaw lay, not in the truths it embodied, but in the way that these truths were implemented in the lives of some of its most fanatic adherents. For all of its brilliance, for all of its power and majesty, there was something that had gone wrong in it, something attributable to human failure.

The flaw was the legalism that had been allowed to corrupt and distort the essential meaning of the faith. The legalism had begun as an attempt to make the faith practical in the lives of the worshippers. But in time, the legalistic perspective had become a monster that threatened to swallow the truths that had given rise to the laws.

In Matthew 12 we find a simple illustration. Jesus and his disciples are journeying through some grainfields one sabbath day. Hungry, the disciples began to pluck some of the ears of grain.

There were two perspectives on this little incident. First, the disciples were "Hungry." In fact, they must have been famished to turn to the grain for nourishment. Secondly, working on the sabbath was against the Jewish law and surely plucking grain would be considered work!

That they might accuse him

Although the heart of the Jewish faith called for compassion upon those in need - the hungry, the thirsty, the sick, the widowed, etc. - still the Pharisees chose to focus on the legal, rather than the humanitarian perspective. To them, it was more important that work was illegal than that men were hungry.

How often today we find that religious people still choose to focus upon the legalistic or ritualistic perspective and ignore the simple needs of their fellowmen. We still seem more concerned to ask whether something is "lawful" than whether it is "needful."

So it was when Jesus healed the man with a withered hand on the sabbath. The pharisees were little concerned with the man's need, but were hung-up on the question: "Is it lawful to heal on the sabbath?" (12:10). Their real motivation shone through: " . . . so that they might accuse him."

Our religious systems, doctrines, and liturgies may be very impressive, but as Jesus said: "Something greater . . , is here" (12:6). And that "something greater" cannot help but always lead us closer to the needs of our fellowmen.

NOW IS THE TIME. . .

To Recognize the Value of Lime

Those who try to farm, garden, or keep lawns without due attention to lime requirements are not making efficient use of all materials. The story of soil testing, to learn of the needs of the soil, is an old story, but still needs more attention on some farms or properties. I've heard farmers say they lime every two years in order to keep their soil in good condition; however, if no lime is needed, they are wasting money and lime. On the other hand, if lime is needed and not applied, then fertilizers cannot be utilized to the highest degree. Proper liming and soil acidity makes better use of commercial and organic fertilizers. Don't forget the value of lime this year.

To Handle Livestock Waste as Fertilizer

At the recent Cattle Feeder's Day it was pointed out that all types of livestock and poultry manures are a valuable source of fertilizer for farm crops and should be managed as such. With the high livestock and poultry population in this part of the country there are tons of waste produced that can greatly reduce the amount of commercial fertilizer needed; that is, if the material is handled and stored properly. Protection from the weather is very important, if it is to be stored. The holding of the liquid part of the manure preserves much of the fertilizer content. Don't pile it back of the barn and forget about it, because this is wasting fertilizer on one hand, and requiring the producer to buy more fertilizer at a future date.

To Improve Management

It appears that both beef cattle and swine producers may be facing a period of lower market prices; this has happened before and should not be disastrious to the good manager. When production costs remain high and market values drop, then the producer will have to check his management to plug every loop-hole of possible losses. We refer to parasite control on livestock, both inside and outside. Stomach worms and body lice continue to feed on too many animals in this area and will cut down on gains and feed efficiency. The control of rodents such as rats and mice should be on the management list; don't feed them along with your livestock, if you want to make any profit. Doing things that should be done, and done on time, will help keep up the bank account.

Farm Calendar

Feb. 2

Beef Cattle Management Seminar at Schuylkill's Penn State campus. Meeting starts at 7:30 p.m. and will feature David Kantner, county agent, as speaker.

Land use meeting, at the Lancaster Farm and Home Center, 7:30 p.m.

Twin Valley Adult Farmers meet at the High School for arc welding class, 7:30 p.m.

Manheim Young Farmer meeting at the high school. Subject: manure handling.

Feb. 3

DHIA workshop for Lebanon County, in the Municipal Building, Lebanon, from 1-7 p.m.

State Fruit Growers Meetings, Sheraton Inn, Gettysburg, lasts through the 5th.

Ephrata Young Farmers meet at 7:45, topic is alfalfa management.

Feb. 4

Crops Day for Adams County, at the Gettysburg National Bank.

DHIA workshop at the Farm and Home Center, 1:30 and 7:30 p.m.; and at 12:30 at the Quarryville Fire Hall.

District 5 of Inter-State Milk Producers hold meeting at Meadow Hills at noon.

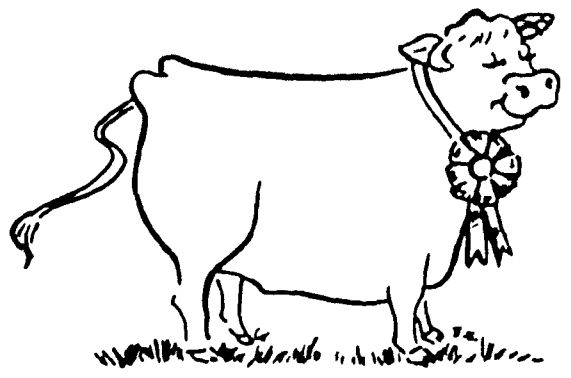
Feb. 5

4-H beef and lamb banquet at the Lancaster Farm and Home Center, 6:30 p.m.

DHIA workshop at the Lancaster Farm and Home Center, 9:30 a.m.

Feb. 7

Ephrata Area Young Farmers Banquet at the Mt. Airy Fire Hall, 6:45 p.m.



It's Performance that counts!

150,000 samples checked per month

Inspectors aim for protection

By DIETER KRIEG

HARRISBURG - With approximately 16,000 farms to inspect, Pennsylvania's milk sanitarians have a big job to do throughout the year. Officers at the Bureau of Foods and Chemistry, Division of Milk Sanitation, here, estimate that their approved labs check upwards of 150,000 samples of milk per month.

This monitoring of milk quality - from farm to supermarket - has the dual purpose of assuring consumers a clean, disease-free, unadulterated supply of milk; and providing producers and processors with quality standards which insure existence of a market.

The constant aim of the inspection program on the farm is to have all producers meet minimum standards which are conducive to the production of high-quality milk. It's a goal which is never fully achieved, says G. William Fouse, chief of the milk sanitation division. The reason for this partial failure is two-fold. The immense porportions of the task make it physically impossible to monitor every individual situation, and it's some peoples' nature to not heed sanitation regulations. We will always have a certain group of farmers who are cut off the market or who are border-line cases, Fouse indicated. The majority, however, are in line with the state's sanitation regulations.

Nevertheless, when a problem arises, and the milk sanitation division is made aware of it, approved inspectors check on the situation and apply codes to remedy it.

Fouse's division has the responsibility of checking milk all along the route from the farm to the supermarket. The task includes all stores which handle milk, bottling and processing plants, at least 1,200 tank truck drivers, milk trucks, and 16,000 producing farms.

A staff of 22 people directly under Fouse's command facilitates in carrying out the public health laws. Sixteen of these work out of seven regional offices which are scattered throughout the state. The network of dairy sanitarians spreads out from there to include 650 inspectors, of which only 150 are designated as "agents of the Secretary of Agriculture." Much of the work is contracted to 60 commercial laboratories whose services are hired for the purpose of getting the monumental task of testing accomplished. Each of these laboratories and their director is state-approved, says Fouse, and each analyst is tested for skills and accuracy twice a year.

With much to do, and a limited staff, Fouse admits that problems do arise from time to time. On top of that, milk is often a subject of consumer concern, and consequently a political issue. This makes the task of his office even more difficult. Fouse has been a member of the dairy sanitation division since 1958 and worked as a quality control technician in industry prior to that. In 1969 he became head of the division of milk sanitation.

While his office still has a sizable task, it is not as broad-based as it once was. Prior to 1972 his inspectors were going all over the country to inspect farms and distribution points which were shipping milk into Pennsylvania. A new law, however, has eliminated this program and Pennsylvania now has "reciprocal agreements" with other states to take care of these type of situations. Fouse noted that 80 per cent of the milk supply in the Commonwealth is subject to conform to federal standards.

To be a state-approved inspector, the applicant must not only pass tests on procedures, but also demonstrate in the field that he can effectively communicate with farmers and milk handlers. In other words, the ability to handle a problem is as important as being able to point it out. Persons with a dairy farm background are preferred.

The average inspector has 100 farms under his jurisdiction, Fouse said. They are trained in various aspects of milk sanitation, as well as pesticide regulations, and related matters such as bulk tank agitation pipeline installation criteria, and leucocyte counts. Commenting on pesticide regulations, Fouse indicated that they are strict, but that they, and any other activities of his department aren't meant to hurt anyone. "Our job is to protect the public," he explained, "we are not out to penalize anyone unjustly." Admitting that a dairyman can face considerable financial losses if pesticide residues are found in his milk, he stated that some monetary help from the U.S. Department of Agriculture is available IF it can be proved that the pesticide in question was used according to directions.

Service, efficiency, and integrity of the sanitation program have improved over the last few years, as Fouse sees it. A new regulation, for example, makes it mandatory for his department to be notified of any shipper suspensions and take-ons within 24 hours. This is to prevent "banned" milk from entering the market via alternative outlets. Efficiency has been improved upon through the previously mentioned "reciprocal agreements."

The integrity of samples had been a big problem in the past, Fouse stated. "But producers can be assured now that the laboratory report he receives reflects the actual quality of the milk in his farm tank. This provides assurance of safety not only to the consumer, but also farmer-producers. The integrity problem has been eliminated, Fouse explained, by making sure that all sample testing is certified, weeding out sloppy samplers, and insisting on offical samples. There was a time when "official" samples came straight from any bulk tank driver.

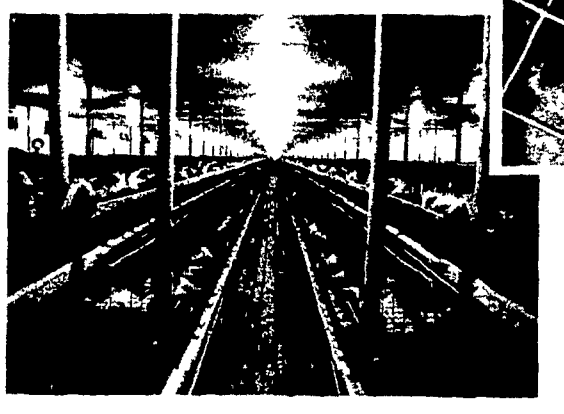
CHORE-TIME/POCKMAN . . . offers industries most advanced and dependable cage construction

The Pockman division of Chore-Time, the one responsible for many developments widely used throughout the industry in the manufacturing of cages . . . offers a wide variety of proven cage styles available to fit existing or planned layer operations.

In addition to "Galv-A'Weld" processing, the bottom, back and top cage sections are formed of one piece wire mesh. This one piece construction means extra strength and rigidity for maximum bird load and positive egg roll out slope. Cage partition attachment has 7 point suspension and is engineered to provide both support and an "inner-spring" action to the cage floor. This provides a cushioning effect for eggs reducing cracks and checks. Pockman cages are also produced in half lengths and widths to permit utilization of the entire interior of the layer house without high cost installation.

Chore-Time completes the totally mechanized cage package with proven cage feeding, watering and egg collecting.

Recognized Leader In Cage Design & Manufacturing For Maximum Production



Only Chore-Time Pockman Offers "Galv-A-Weld" Cages, that are galvanized after welding with a layer of Zinc 4 times industry standard.

Cattle market future looks promising

[Continued from Page 1]

cash levels to make it profitable," he stated.

The economist explained that many changes are in evidence for the industry with the greatest emphasis now being placed on the "adolescent beef" which experiences no grading.

Consumer buying will also be a factor, as last year 42 percent of the beef purchased was in the form of hamburg or processed meat. "No one is sure if the consumer will be willing to pay more this year," he stated.

"If the hamburg supply drops there is likely to be a price increase and who knows if the consumer's confidence will stay with beef."

Also the new grading system for beef, which will go into effect after Feb. 23, is likely to have some effect on the industry.

Moore explained that the outlook surveys would be easier to pinpoint if economists knew how long farmers would be holding their grain and how much Russia would buy.

"The grain situation is a guessing game," he noted, "which makes the outlook somewhat more difficult." The rate of inflation (usually unpredictable) also has an effect on the market situation.

While many variables are still lurking on the horizan, the cattle industry, on an overall view, looks promising but without the large profits realized by some feeders last year. According to the Penn State economist, the bicentennial year may not be as favorable for cattle feeders but an improvement is in sight for the cow-calf operators.

Dr. Les Burdette and Lou Moore, extension specialists from Penn State, look over a program from the annual Cattle Feeder's Day held in Lancaster. Both served as speakers for the event.

Lancaster

[Continued from Page 1]

vinced that direct markets are doing a better job," McCoy stated. "After the big defaults by packing outfits last year, people are more interested in taking their livestock through commission firms, this has helped marketing."

McCoy also noted that the high sell off of cows by culling had been widespread last year adding to the numbers coming to the auction. "It just wasn't profitable last year to keep a cow that wasn't producing good," he explained, "a lot of culling took place and sent numbers to the stockyards."

The cattle situation of the bicentennial year may seem difficulties however, according to the stockyards president. "With an election year upcoming, the cattle situation may not be too good."

"The consumers keep looking at the price of food and if it doesn't come down, they look toward the candidates and government to reduce prices" McCoy stated. The auction official explained that history substanciated the point that election years were never good for cattle numbers.

McCoy explained that producers must remain current in their offerings if the price is to stay relatively good. If the producers become "bullheaded" and hold their cattle it is going to hurt the market and prices.

While there are many variables still to be considered including imports and grain prices, the cattle market for the coming year may very well see a narrowing of prices which stays close to the $40 per hundredweight mark.

Area tobacco

[Continued from Page 1]

what was received by most growers last year.

Farmers who have sorted their tobacco are likely to do a little better in prices than those who are offering the crop with good and bad leaved mixed, Mann said. The reason for wanting the tobacco separated is because the better quality variety is useful, while the lower quality leaves aren't considered to have much value.

Although the Mann spokesman considered the crop to be not quite as good as last year's, some other company officials will go further than that and say the quality just isn't there. A less than ideal growing season, unfavorable cutting conditions on some farms and delayed schedules in stripping all contributed to the lack in quality.

Over-all, however, if any guess can be made - farmers may expect a price within the 56 to 58 cent range, reports indicate.

Swine meeting slated

The Garden Spot Adult Farmer Program will be holding an educational meeting for area swine producers on Tuesday, February 3, 1976 at 7:45 p.m. at the agriculture classroom of the Garden Spot High School. The subject area to be discussed will be, Selecting Breeding Stock. A panel type discussion will be held with the panel being made up of area breeders and Lancaster County Swine Producers Assoc. Directors, John Henkel, Mark Nestleroth, and Tony Folker. All area swine breeders will find this a most informative meeting. Swine fatteners are also invited and can add a lot to a meeting like this as the discussions progress.

Areas of concern with selecting breeding stock include: What type of animal do the packers want? What records should be considered when selecting boars? What gilts should be kept in the breeding herd? How can local breeders use sonaray assistance? and, Where can a breeder purchase quality breeding stock?

Swine fatteners will want to know if they can afford to pay a little more for feeder pigs from selected breeding stock. This question will be raised and representatives from feed companies who purchase feeder pigs for contract will be available for comment as well as the panel of breeders.

All area swine producers are invited. Refreshments will be served.

Fultonway's 'Rae' completes eighth record over 1000 lbs.

Willow Street - Another official production record exceeding a half ton of butterfat has been completed by Fultonway Ivanhoe Rae 4977152 (EX), a registered Holstein cow owned by J. Mowery Frey & Son, Lancaster. This is the eighth time that "Rae" has achieved the 1,000 lb. butterfat production level in a single lactation. This record ranks among 5,104 similarly completed by registered Holstein cows on official test.

The Pennsylvania holstein's official record of production totalled 24,193 lbs. of milk and 1,049 lbs. of butterfat in 365 days. She started her lactation at the age of 15 years one month and was milked two times daily.

"Rae" is the only cow in the breed to have completed eight 1,000 lbs. butterfat records.

"Rae" has also been designated previously as a Gold Medal Dam. The Gold Medal award recognizes a cow's ability to transmit outstanding milk production and body conformation to her offspring.

Fultonway Ivanhoe Rae was bred in the Frey herd. She was sired by Osborndale Ivanhoe 1189670 (EX), a bull that has earned Gold Medal Sire recognition.

Pennsylvania State University supervised the weighing and sample testing of her production in cooperation with the Dairy Herd Improvement Registry program of the Holstein-Friesian Association of America.

Ag-safety Tip

Big round bales can be dangerous if not handled properly, according to Sperry New Holland, farm equipment manufacturer which has designed big bale moving and handling machinery with operator safety foremost in mind For a booklet, "Farmer's Guide to Round Baling," which includes safety information as part of the complete story about round bales, write to Sperry New Holland, New Holland, Pa. 17557.

Letters to the Editor

(Editor's note) The following letter was sent to a businessman in Lancaster County who purchased a farm show steer from a young 4-Her.

Just dropping you a line to thank you for participating in the 1976 beef sale at the Farm Show. Your support was greatly appreciated.

This was my first year in state competition. I am a fourth year member of the Fayette County Beef Club.

The name of the steer you bought is "Fred." Fred was born on my father's farm. He is 18 months old. We brought him to the show in my father's pick-up truck - he seemed a little nervous on the trip and lost about 60 pounds. It was a rewarding experience to participate in the Farm Show.

E-town FFA'er selects dairying as his career

By MELISSA PIPER

ELIZABETHTOWN - While the future of dairying may well be tinged with problems and questions, one youth has expressed his interest in staying with the enterprise because "someone has to provide food for the consumers."

James Rutt, a senior at Elizabethtown High School, would like to have his own farming operation following his graduation this spring and the youth feels that dairying is the specialization he'd like to try.

As many young people have expressed, Jim is concerned about what agriculture might be like in the future but agrees that farming will still be needed in years to come.

Jim is no stranger to farm work as he has helped extensively on his parents, Mr. and Mrs. Leroy Rutt, farm near here. Raising about 125 acres of corn has been a big project for the youth and his father, along with fattening about 70 head of beef and milking 36 Holsteins. Jim has also raised capons for the past three years which have provided a little extra income for the FFA'er.

A member of the Elizabethtown FFA Chapter, Jim has served the local group as secretary for the past three years and is currently secretary of the county (Red Rose) FFA organization.

The youth has also been a member of the banquet, sports, awards and executive committee for his chapter.

Jim has been active in many FFA activities along with his project work. The senior has been the recipent of several awards for his projects book - earning a bronze medal for his six enterprise book at both county and state level.

A participant on the small gas engines team, Jim won first place in the local contest and went on to Penn State to finish third in the technical competition.

As a freshman, Jim won the FFA creed contest at Elizabethtown and since that time has been named the Star Chapter Farmer and the Star Red Rose Farmer in the local club.

At last year's FFA awards banquet, the youth received the dairy management award, the chapter's soil and water conservation honor and was also selected as having contributed outstanding leadership.

When asked why he had chosen to join FFA, Jim explained, "many of my neighbors had been in the program and enjoyed the work, I joined for that aspect and have appreciated the many ideals it has provided me with."

As a young FFA member, Jim named the Keystone Farming Degree as his one goal to work for. During his four years, the youth diligently prepared for the degree by both participating in activities and by project work in the beef - dairy field.

Four years of hard work paid off though for the farming youth as he recently received the Keystone Farming Degree at the FFA Mid-Winter Convention held in Harrisburg.

Agriculture may have many changes in store, but Jim will be one of many young farmers in the area who will be striving to keep farming in high regard.

Jim Rutt, Elizabethtown R1, recently received his Keystone Farming Degree, a goal he has worked toward for four years.

"Let us never forget that the cultivation of the earth is the most important labor of man."

Farmer's union elects area officers

NEW CUMBERLAND - The Pennsylvania Farmers Union, which claims to have approximately 3,000 members state-wide, met here at the Sheraton Motor Inn on Monday and Tuesday of this week to hold its annual convention.

The Pennsylvania Farmers Union, as yet, is not large enough to hold its own charter, but is nevertheless, active and affiliated with the National Farmers Union which claims family memberships of nearly a quarter million. In the Tuesday afternoon session, 13 county organizations were either chartered or rechartered to allow for increases in membership. A list of those chapters, their presidents and respective home towns follows:

Lancaster County local, president over by Albert Mellinger of Strasburg.

York County local, Albert Bentz of Thomasville is president. He succeeded Albert Garber, who stepped down last Tuesday.

The Chester County local is led by Cox Shepherd of Cochranville, who along with Bentz was elected to serve as a director to serve on the executive committee.

The Perry County local has Truman Holman as president. He's a farmer from the Millerstown area.

Lehigh County's chapter selected Lester Loch of Kempton as president.

Franklin County's chapter president is Harold Goshorn, who hails from Dry Run.

Columbia County farmer, Paul Zeisloft of Danville heads the local in his County.

The Somerset local is headed by George Stahl, Somerset.

The Mercer County local has Robert Ross of Greenville at the helm.

In Washington County it's Irk McConnell who will preside over the local chapter.

Clarion County's local selection Ronald Whitling of New Bethlehem to head its unit.

Jefferson County Farmers Union local is presided over by Ivan Himes of Brookville.

Crawford County's Donald McNamara from Meadville is head of his County's chapter.

The two-day meeting, held just across the river from Harrisburg in the spacious facilities of the Sheraton, was attended by approximately 70 members and delegates from all over the state. Highlights of the affair included an address by the state's secretary of agriculture, Raymond Kerstetter; remarks by Edison Osborne who heads the Bureau of Markets within the Pa. Department of Agriculture; and Tony Dechant, National Farmers Union President.

Not being chartered yet, the Pennsylvania Farmers Union does not have its own offices and is guided instead by the national office. Forney Longenecker, who farms outside of Lititz, Lancaster County, serves as organizational director for Pennsylvania.

In continuous existence since 1902, the National Farmers Union has "Cooperation, Legislation, and Education" as its motto, and proclaims the protection of the family farm as its single most important purpose. It has used the term "union" - meaning "united effort" since its beginnings which was before labor organizations became widely identified with the term. The national organization's full name is "Farmers Education and Cooperative Union of American." Headquartered in Denver, Colorado, it is sometimes confused with the National Farmers Organization, which is an entirely different group.

Prior to the convention's closing on Tuesday afternoon, the group selected five people to serve on an executive committee for the advisory board which is comprised of the presidents of all local chapters.

Lancaster County's Al Mellinger, Strasburg, was chosen as chairman. A dairyman with 275 head of Holsteins (including youngstock), Mellinger is in his third year as a member of the Pennsylvania Farmers Union. He underlined the group's number one purpose as being "very strongly interested in the family farm."

Joe Gross, who heads the Northumberland unit, was elected to the position of vice-chairman on the executive committee. Irk McConnell from Washington County is to serve as secretary-tresurer.

The National Farmers Union convention will be held in New Orleans, March 14-17, it was announced, with Joe Gross being the Pennsylvania delegate to that affair. Albert Bentz was picked to serve on the policy drafting committee for the National Convention.

Albert Mellinger, president of the Lancaster County chapter of the Pennsylvania Farmers Union, receives a newly signed charter from Bob Lewis of the National Farmers Union. The Pennsylvania Farmers Union to date is not large enough to have its own charter and is therefore without state-wide officers. The group held its annual meeting in New Cumberland earlier this week.

What's New

Beef cattle formulas help reduce consumption

Pennfield Feeds will soon offer beef cattle producers the opportunity to buy Pennfield beef cattle feeds formulated with a new non-hormonal high efficiency feed additive, which was announced this week by Joel Habegger, feeds division manager for the Pennfield Corporation of Rohrerstown.

Recent testing and research by a major agriculture pharmaceutical company and the FDA have established that these new beef formulas will enable the cattle producer to reduce feed consumption by about ten percent, while maintaining normal growth and development in his herd. Habegger stressed that the new additive in the formulas is not a hormone or growth stimulant, artificially stimulating an animal to eat more feed to grow larger. Instead, it changes the animals natural rumen digestion, making the rumen more efficient in converting feed into energy for maintenance and growth.

In short, Pennfield's new feed formulations will improve feed efficiency by producing equal gains on less feed.

Throughout the extensive testing of these new, high efficiency formulations there has been no evidence of stress in the test animals, and there is no withdrawal time for cattle raised on the formulations. Feed savings continue right up to the time the cattle are marketed.

Testing indicates that the new additive in these formulations is equally effective in all types of cattle ... steers, heifers, yearlings, purebeds, and crossbreds. And, it improves feed efficiency in all rations - from high concentrate to high roughage.

When asked why Pennfield, a feed company, will be offering new feed formulations which will reduce feed consumption, Habegger pointed out that the company prides itself on being an Agri-business consultant to its customers, not just the feed supplier. "The remarkable feed efficiency of these formulations is an important new discovery," said Habegger. "It is Pennfield's policy to seek out and make available all new methods or techniques which will help our customers run a more modern, efficient and profitable operation."

Pennfield Feeds will begin offering these high efficiency beef formulations following routine government approval to do so. The new feed formulations should be available some time in mid-February.

Additional information about the unique feed efficiency capabilities of Pennfield's new beef formulations is available by calling Pennfield Livestock Feed's manager, Bob Gregory or Joel Habegger, collect, at the Pennfield Feed's Offices in Rohrerstown - 299-2561.

Storage Hints

Keep foods like jelly, pickles, peanut butter and mustard in the refrigerator only if the label says "refrigerate after opening." If possible, keep coffee in the refrigerator, tightly covered. Store fat drippings, lard, margarine and butter tightly wrapped in the refrigerator. Vegetable shortening should be covered at room temperature. Homemade salad dressings must remain in the refrigerator, too

Butz addresses York meeting

YORK — U.S. Secretary of Agriculture, Earl Butz, made an appearance in York a week ago yesterday (Friday), to speak before the 13th annual Agribusiness Seminar, sponsored jointly by the York County Agricultural Extension Service and the York Area Chamber of Commerce.

Displaying a sense of humor — much of it "canned" since he uses the same jokes over and over again at different speaking engagements — Butz had the audience laughing intermittently. Although this paragraph is not intended to be an editorial column, it could be said that the Secretary's presentation was more entertaining rather than revealing of agricultural policies. More than anything, it was, perhaps, a talk stressing the importance and potential of agriculture. The reader is invited to judge for himself, as we present the bulk of Butz's speech:

"It's a real pleasure being here — I commend you for this agri-business seminar that I understand the Chamber of Commerce sponsors," Butz said. Upon learning that the Extension Service was also involved with it, he quipped: "I should know that anything worthwhile, Extension takes credit for." After a burst of laughter, he acknowledged: "And usually they deserve it too."

A minute or two of small talk followed, then he focused for a time on agribusiness.

"Agribusiness has kind of a bad connotation in this country. The word agribusiness has kind of a bad connotation," he continued. "When I was up for confirmation four years ago the liberals in there beat me over the head without mercy because I had had some association with agribusiness. This was evil. It's not at all — I think it's great. We are all part of this great food and fibre complex in America." (The audience was divided nearly half and half between farmers and agribusinessmen.) "And anybody who tries to send one sect of that against another is doing a great disservice to this whole agricultural complex in America.

"Because this milk that came from a Holstein cow out here this morning — one of these farms — doesn't have much value until it's packaged either as milk or butter or cheese or whatever it may be and attractively displayed in a supermarket counter in Philadelphia or New York. That's agribusiness. The bushel of wheat produced on a Kansas farm doesn't have much value . . . until it's an attractive breakfast roll in a Philadelphia pastry shop. That's agribusiness. When I was on a farm back in Indiana we used to produce our own power . . . we had a colt or two foaled each year. We produced our own fuel — we raised oats and hay. We produced our own nitrogen and we hauled it out of the cow stable. Now somebody supplies it much more effectively than we did it then, and at much lower cost. That's agribusiness. It's all a part of this food and fibre complex. And somebody says: 'Yea, but they make a profit.' I say: 'I hope they do.' Like farmers, they deserve to, that's what they're in business for.

"The other day I was in a news conference somewhere out here in one of the larger cities and some woman who must have been the food editor — she asked a question with a kind of a sneer in her voice. She said: 'Well, aren't farmers making money?' I said 'I hope so, I think that's what they're in business for.

"You can't convince me that some of you chaps in this room get up at five o'clock in the morning, seven mornings a week and go out to the cow stable because you like to associate with Holsteins. I think you have a higher motive in life than that. As somebody said: "I think you're not that queer.'

"So it's good that we sit down together and examine this whole food and fibre complex, or somebody has called it the 'food chain.' That sounds like a grocery store, doesn't it? It starts clear back here at a gas well from which we make nitrogen . . . from which we make grain, from which we make milk and meat, and then it goes right on to those who process it and merchandise it. It's all part of that business. There's only about five per cent of us in America on farms now, but agribusiness means that many, many more of us are involved in that food and fibre chain than that. For every one (worker) on farms there is another worker making production inputs for American agriculture. For every worker on farms there are two more workers processing and

MODEL 100 MECHANICAL MANURE PUMP
- Handles semi-solid to free-flowing slurry
- Underground 12" PVC pipe
- 10 HP electric motor
- Plunger 8" x 15" - 21 strokes per minute
- Easy and low maintenance

MODEL 200 COMPRESSED AIR MANURE MOVER
- Handles slurry type manure
- 1700 gallon underground holding tank
- 12" PVC underground pipes
- Tank filled by gutter cleaner or scraper
- No moving parts
- Only 15 PSI required
- Relief valve 50 PSI supplied
- Simple and low maintenance

Butz addresses York meeting

[Continued from Page 18]

distributing food and fibre. This is part of the agribusiness complex. And we do it very well in this country. I make no apology for it. I think it's a wonderful organization. When I was a youngster on a farm back in northern Indiana . . . you ask 'how long ago was that . . . well, I was born in 1909 . . . that makes me 66 now and . . . well, like George Goodling, there's plenty of life left in us yet because I'm identically the same age as Wilbur Mills." (The audience burst out with laughter, as they had done serveral times previously.)

"When I was a youngster there were 40 per cent of us on farms in America . . . now five per cent or less. If we had known when I was a youngster how to make radios and TV's and nice air-conditioned automobiles and air conditioning for our homes, bathtubs and central heating and all that stuff, if we had . . . we had none of that, I didn't grow up with five rooms and a bath . . . I grew up with four rooms and a bath. On those cold mornings like this you learn how to do things in a hurry. If we had known how to do that (build modern conveniences, etc.) we couldn't have spared the man-power to do it — we had to have them on the farm with a pair of plow handles in their hands. We were so inefficient in this whole food business that it took almost half of us to feed the other half, and then not very well.

"Now in the short span of a lifetime come to the position where we do this tremendous feeding job for Americans and millions and millions beyond our shores with just a shirt-tail full of man-power and a relatively small input of resources. And we feed our people in this country for about 17 per cent of their take-home pay. I think that's pretty good. And a lot of people criticize us. They say food costs are high . . . they're always going to say that.

"Seventeen per cent of take-home pay — less than any other nation any place on the face of the Earth . . . and we feed them better too! In that 17 per cent . . . the food . . . you have all that built-in "maid service." Frozen TV dinners, they don't come for cheap; we process almost 60 per cent of our potatoes in America now . . . that's not for free . . . somebody gets paid for doing that. In that 17 per cent we have over a third of the meals eaten outside the home in America. That's not for free.

"When these people get to rearin' up and say that somebody is rippin' off by charging too much for food, let's make a few comparisons:

The only other nation in the world that's under 20 per cent is Canada . . . they're at 19. The best nations in Europe are 22 to 28. In Russia it's 35 to 40 per cent. You make the "great leap" forward in China and it takes 75 to 80 per cent. "We're doing pretty well . . . and because we spend such a small share of our income for food, we're a nation with over 90 per cent of our families owning an automobile, two-thirds of them have two automobiles. Two TV sets. Most of the stuff isn't good enough for one (referring to TV programming).

"We can afford that because we feed ourselves with just a small share of our total productive effort. That's what this tremendous American agricultural plant and agribusiness have done. They've worked together. And when these demagogues . . . I've got other words for them sometimes . . . and you had one recently as Secretary of Agriculture in Pennsylvania here . . . (laughter, again) try to set one sector against the other . . . they're doing a great disservice to the whole food industry in America.

"Obviously you believe what I'm saying — you're nodding your heads. I'm preaching to the converted . . . I got the wrong crowd here. Like the preacher on Sunday morning — the guys he ought to reach are on the golf course, or by the ski slope this time of year.

"Food is the only thing left in American society we pay cash for . . . we sign a slip for anything else. And therefore once a week or twice a week the housewife goes to the check-out counter and thinks 'if I just didn't have to pay cash for this I could buy a new record or another TV set for the rec room in the basement.'

"The most popular committee in the House of Representatives a year ago was the House Committee on Agriculture. Twice, Speaker Albert enlarged that committee to make room for people who wanted on it. There are members on that committee who don't even have a greenhouse in their district. But they wanted on the House Committee of Agriculture. Why?

"The first goal of nearly every newly-elected congressman is to become a senator. The best way to do that is to get in front of the TV camera. The best way to get in front of the camera is to demagogue the food issue, because every housewife thinks you're great if you're going to give'em cheaper food. The best platform for that is the House Committee on Agriculture. That's what I put up with down there. Some of those characters wouldn't recognize the working end of a cow.

We got a PR job here in American agriculture. I just want to discuss a few things with you now that I think are on the plus side.

"We've got the most positive food policy we've had in years. It's a policy we can describe in a single word: PLENTY. A sharp contrast to the 40-year program of quotas and allotments and cut-backs and curtailment . . . of holding this great agricultural machine in check in a world that needs food, we've turned it around. A policy of heavy government payments, a policy of you fellows going down after dark to the ASCS office to pickup your check - you were kind of ashamed to get it - and sent it in by mail because you didn't want anybody see you depositing that . . . a policy where four years ago we were spending four-billion dollars a

Butz addresses York meeting

(Continued from Page 19)

year to farmers . . . that's been cut down to half a billion dollars now. Four years ago we were spending a million dollars a day in storage costs, that's been cut virtually to the vanishing point. Four years ago the best we could do in net farm income in this country in the agribusiness was 17.3 billion dollars, which included four billion dollars of government payments. We just finished three years now in which net income has stopped $25-billion. The best indications are it's going to do that again in 1976, without government payments. It's been a turn-around in farm policy.

"There's always one part of agriculture that's up, and another one down. These are average figures. There are exceptions." Butz also indicated that farm exports have tripled in the last four years from $7-billion to $22-billion and predicted that this year they would be just a little over $22-billion. "We're going to export 100-million tons of grain from this country this year - including rice and soybeans." Agriculture is the number one earner of foreign exchange in this country, and is responsible for having put this country's trade-balance in the black. "And this puts us (agriculture) in a tremendous position of strength in this country, I think, to do that.

"People argue with me that if we just didn't export, food would be cheaper at home, some people say," Butz continued. "That's as phoney as a $3 bill. We've got to export or cut back on production."

According to Butz there is five cents worth of wheat in a one-pound loaf of bread, which represents about one-ninth of the cost. "Eight-ninth of the cost of a loaf of bread is what somebody else put into it (costs). "Today it costs more to drive the bread from the bakery to the supermarket shelf than it cost to put the what in it. - Now let's get our facts straight . . . that's what I'm talking about here. Today, the farmer gets about 42 cents of the consumer's food dollar. We've been chasing that 42-cent rabbit long enough. I'm getting tired of it. I want to start chasing that 58-cent rabbit. That's where the pay-dirt is. That's where the feather-bedding is. That's where the heavy labor costs are. And most of that 58 cents is labor, and I want labor well-paid, but I'd like to have them to work on the job, instead of all these curtailments we put into it. When George Meany stopped loading wheat down at the Gulf ports last summer under the guise of protecting the cost of living in America, I shuddered.

"To have George Meany to be the protector of the cost of living for consumers - it's like sending the fox out to guard the chicken coop. All they want is a bigger rip-off from the treasury for the longshoremen to get paid for not working, and they got it, and we write that into the cost, somehow or other along the process, you see.

"American agriculture has got a record of increased output per worker and increased efficiency the last 20 years that is absolutely unequalled by any other major sector of the economy. It's a tremendous record. It makes us the world's most efficient producers. Therefore the world's best source of supply for these $22-billion worth of stuff we export. We're always going to be that way because you farmers in this room haven't learned yet to punch the clock at 40 hours. You haven't learned yet to go out to the stable and say 'Look, Bossie, I'm going to shut you off, I'm going to be gone for three days.' But most important of all, you haven't learned yet to put two drivers in a tractor cab like that Penn Central locomotive that goes through this town - if it's still going. And because they've had two drivers in the cab, and everything else they didn't need, they're in trouble. But not so our American farmers. They're still profit motivated. They're working for themselves.

"I think the world's number one problem in the generation ahead - the world's number one challenge - is: Are we going to be able to increase food production in the world fast enough to keep pace with this still exploding population. At some point you've got to bring the population under control.

"I've seen hungry men on the other side of the Earth, I've seen starving men. No use talking to them about democracy; no use talking about human freedom or human dignity, or human liberty. They listen only to the person who has a piece of bred. That's a powerful language.

"That's the language that the United States is prepared to speak powerfully and eloquently. We're just learning how to speak it. It's a new role for us . . . we're awkward in the way we use it. But we are learning how to speak it - the power is here, the tool is here, it's here because this tremendous American agribusiness complex that I see represented here in this room this morning. Working for ourselves - our own capital - our own labor - our families pitching in with them - trying to make a little money. There's no system in the world that has ever beat it. No system ever will beat it. It's up to us to make sure that we preserve that kind of system, that kind of philosophy, in this country - and if we do, I am sure that the third century of American history will be even more glorious than it has been in the latter years of the second century.

$11.86 price set

The Class I price for February 1976 is $11.86 per hundredweight for 3.5 percent milk. The price increased 24 cents from January, and is $2.28 above the February 1975 Class I price.

The February 1976 price is based on a December 1975 Minnesota-Wisconsin manufacturing milk price of $9.06 per hundredweight for milk testing 3.5 percent butterfat, plus $2.78.

The Class I price has increased each month since January 1975, with the exception of April when there was no change from the previous mounth. During that time, the price has increased $2.32 per hundredweight from $9.54 to its latest level of $11.86.

Directors elected to F & H Foundation board

During the 13th Annual Lancaster County Farm and Home Foundation dinner meeting, one new director was elected to the board with six present directors selected to three year posts.

Mrs. Raymond Witmer, Willow Street, joined the board as a new member with Mrs. John Hess, Columbia R2; Abner Houseknecht, Millersville R1; J. Everett Kreider, Quarryville R2; Jay E. Landis, Lancaster R6; Mrs. Ruth Phillippi, Lancaster and Larry Skromme, Lancaster, being renamed to the Foundation's board.

The directors were elected during the business portion of the meeting which was conducted by the president Jay E. Landis.

In his yearly report, Landis told the audience that the Farm and Home Center had seen a busy year with a number of meetings having been conducted in the building. He also noted that the farm women of the county had donated over $2000. toward the center for a piano. The instrument had been purchased and is now in the basement meeting room.

Miss Gloria Longenecker, Miss Lancaster County, provided musical entertainment for the evening's event. The music major at Lebanon Valley College, sang a number of selections from broadway musicals along with selections for two operas.

Darvin Boyd, associate legislative research analyst for the minority caucus of the Pa. House of Representatives, was the featured speaker for the dinner meeting.

A former IFYE to Korea and 4-H director in the same county, Boyd expressed the need for Americans to grasp the challenge of commitment in this country and abroad.

Boyd noted that while the United States should be willing to give aid in the form of food, other countries should also be willing to work toward self-sufficiency.

"Technical help is important," Boyd explained, "countries should accept the responsibility of learning to feed their own."

Citing Korea as an example, Boyd told the group that agricultural technology from the United States had helped the country develop a new strain of rice that has increased production of that crop by 50 percent. "This is the kind of help we should be giving," he related.

Boyd explained that America is looked on as the "microcosm of good and honesty" and that even though our country has been plagued with problems, "it is time tested and will prevail to weather the storm."

A former Lancaster County 4-Her, Boyd expressed his gratitude to the organization for the experiences he had gained and also thanked the farm women for their contributions to the Farm and Home Center as well as their role in agriculture.

"Farm women are the real heroines of the bicentennial," he remarked. "They represent a real commitment to our history."

To Follow the Market

I hear considerable discussion recently about the new grading system for beef cattle. At this point how do we know exactly what effect this will have for the producer or the consumer. However, I'd suggest that producers follow the market prices and trends after this goes into action, and determine how each feeding program fits into the new grading system. With the general public so strong against excess fat on red meat in recent years, I can't foresee how the new grading system is going to hurt the consumer; most housewives don't want the fatty meat anyway. Under the proposed grading system cattle should reach the desired market grade of Choice earlier and with less grain, as compared to the former grading system. Let's see how it works out before you start yelling that you are "hurt".

PROTEIN
Don't buy it, grow your own

Good alfalfa haylage may be 20% to 25% crude protein. 90% of the digestible protein is in the leaves. Losing the leaves costs you money. With a Harvestore feed processing system, you can harvest your alfalfa in the bud stage, when it's most nutritious. Cut and windrow one day, blow it into your Harvestore the next. Baling and hard labor are eliminated. The valuable leaves are saved. Supplement purchases may be drastically reduced. Your feed is more palatable, more nutritious. Check it out.

Kutztown Jaycees select outstanding young farmer

FLEETWOOD — Robert Kopfer who farms more than 500 acres near this Berks County community, was selected last month as the Outstanding Young Farmer of the area. Making the selection and bestowing the honor were the Kutztown Jaycees.

Kopfer and his wife, Carol, and two young children reside along Pleasant Hill Road between Walnuttown and Route 222.

While owning only 95 acres, the Kopfers rent an additional 425 which gives them a total of 520 — 505 of which are tillable. The balance is pastureland. He is attempting to buy another farm this year.

Converted to minimum tillage practices several years ago, Kopfer makes use of some of the latest field management techniques and equipment. An off-set disk and chisel plow are included in his machinery inventory. The main crop on the farm is corn, of which 260 acres are raised. Some of it is used as high moisture corn for his 90 steers.

In addition to corn, he raises 90 acres of wheat as a cash crop, 11 acres of barley, 40 acres of soybeans, and 60 acres of hay.

Kopfer got his start 20 years ago as a hired man on his neighbor's farm. In 1962 he began renting 230 acres in order to farm for himself. Eight years later he was rid of numerous financial burdens and took the big step towards being a property owner.

But it isn't just physical work with which the Kopfers are involved. Their progress takes a lot of planning — and to do that the family uses extensive records on crop yields, soil testing, depreciation, weight gain efficiency on steers and so forth.

Robert Kopfer, outstanding young farmer for the Kutztown area, uses minimum tillage practices on his 505 tillable acres.

The Robert Kopfer family of Fleetwood R1 was honored last month by the Kutztown Jaycees as being the Outstanding Young Farmers of the year for that community.

Kopfer was chosen for the award on the basis of his past accomplishments, farm management techniques, service to the community, and future plans. They have two children, a daughter Ann, and son, David.

Tom Zartman (first row left) receives the president's gavel from Earl Stauffer, the Ephrata Young Farmer's outgoing president. Officers for the 1976 year are (from left) Luke Zimmerman - vice president; Mahlon Eberly - PR director; Melvin Nolt - treasurer and Vernon Leininger - secretary.

Winternational pull results announced

HARRISBURG - Twenty-five of the top pulling tractors in the nation competed for honors at the Penn Winternational Tractor Pull held recently at the Farm Show Building here. Results of the pull are as follows:

5000 lb. Modified

1st - Richard Gray, Frankfort, Ind. - 175' 3"; 2nd - Terry Reagan, Frankfort, Ind.; 3rd - Dave Hileman, Rockford, Ohio.

7000 lb. Modified

1st - Banter Bros., Decauter, Ind. 163' 9"; 2nd - Banter Bros.; 3rd - Gaylord Zechman, Green Sorings, Ohio.

9000 lb. Modified

1st - Carl Bosse, Ada, Ohio 120' 6"; 2nd - Gaylord Zechman; 3rd - David Banter, Warren, Ind.

9000 lb Super Stock

1st - Harold McQueen, Manteno, Ill. 154' 4"; 2nd - John Lancaster, Trafalgar, Ind.; 3rd - Dale Haley, Kensington, Ohio.

12,000 lb. Open

1st - Carl Bosse, Ada, Ohio 159' 3"; 2nd - Norman Smith, Versailles, Ohio; 3rd - Dave Haley, Hanoverton, Ohio.

5000 lb. Super Stock

1st - Dale Smoker, Cochranville, Pa. 165'; 2nd - Dave Thompson, Itica, Ohio; 3rd - Carl Bomgardner, Annville, Pa.

7000 lb Super Stock

1st - Donald Thomas, Boonesboro, Md. 166' 2"; 2nd - Bernard Cheek, Taylorsville, Ken.; 3rd - Tom Casting, Franklin, Ind.

12,000 lb. Super Stock

1st - John Thompson, Marshall, Ill. 136' 9"; 2nd - Dale Haley; 3rd - John Bockwitz, San Jose, Ill.

It's an Ag-fact

It's an ag-fact. If the price of bread had increased during the past few years proportionately as much as fuel or fertilizer—two basic raw materials of the farmer—a loaf would cost from $1.37 to $1.68 today.

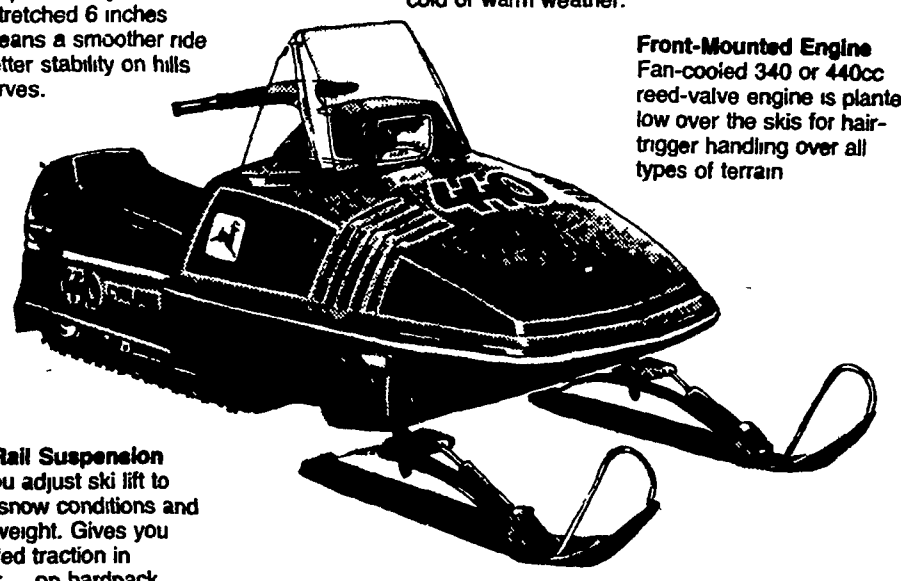
CYCLONE

Stirs up a storm with race-inspired styling

CD Ignition and Surface-Gap Spark Plugs
CD ignition packs a hotter spark for sure-fire starts Surface-gap plugs work in cold or warm weather.

Longer Wheelbase
The suspension system has been stretched 6 inches This means a smoother ride with better stability on hills and curves.



Front-Mounted Engine
Fan-cooled 340 or 440cc reed-valve engine is planted low over the skis for hair-trigger handling over all types of terrain

Slide-Rail Suspension
Lets you adjust ski lift to match snow conditions and driver weight. Gives you controlled traction in powder.. on hardpack.

Disk Brakes
Grip tight on steep inclines Provide fast, fade-free stopping with less chance of moisture buildup.

Wide 32-inch Ski Stance
A full four inches wider than last year. Helps keep you tracking because it reduces sway on hills and switchbacks.

Tackle the high country, or take on gnarled meadow trails. The new John Deere Cyclone is loaded with race-inspired features that humble even the toughest terrain.

High-performance reed-valve engines, in 340 or 440cc's, nestle low to the skis for superb maneuverability. And the wide 32-inch ski stance and longer "wheelbase" hug tight on curves.

Cyclone makes better use of fuel with an expansion chamber that rams unburned gases back into the cylinder. And a Mikuni carburetor with synchronized slide valves produces more power through the middle rpm range. Add CD ignition, surface-gap plugs, disk brakes, and an adjustable slide-rail suspension system and you've got a truly rugged, race-worthy sled. The all-new Cyclone for 1976.

See us now for a Big John Cyclone, color-matched fashions, financing, parts and service

Pa. corn champ

LOUISVILLE, Ky. - Robert Hubler, of Lewisburg, Pa., has won the state award for Funk's Project: 200 corn growing program with a yield of 187.2 bu. per acre.

The announcement was made in Louisville at the national meeting of The Producers of Funk's G-Hybrids, the sponsors of the program. Project: 200 is the largest corn growing program of its kind in the nation.

The national winner was James Corkle, of O'Neill, Nebraska, with a yield of 304.6 bu. per acre.

Corkle's is the sixth known corn yield to ever exceed 300 bu. per acre. Of the six recorded 300-plus yields, five have now been grown with Funk's G-Hybrids.

Regional winners were: G. C. Avila & Son, Laton, California, with 233 bu. per acre; Herman Happel, Saline, Michigan, with 254.4 bu. per acre; Edward Hancock, Sullivan, Indiana, with 289 bu. per acre and Arthur Marlowe, Loris, South Carolina, 274.4 bu. per acre.

Hubler used Funk's G-4284A for his high yield. It was planted on May 8 in 38-inch rows at 21,000 plants per acre.

Hubler harvested his crop on October 20 at 23.1 percent moisture. Harvest population was 19,600 plants.

Hubler applied 159 lbs., of nitrogen, 100 lbs. of phosphorous and 60 lbs. of potash as his fertilizer program. He used AAtrex and Lasso for weed control and Furadan for insects. The yield was verified by disinterested [illegible]ses.

To qualify for Project: 200 Hubler had to harvest shelled corn from a minimum of 4 rows running the complete length of the field. The official yield was adjusted to No. 2 corn at 15.5 percent moisture.

More than 25,000 corn growers have entered Project: 200 in the past 4 years. Each year Funk publishes a computerized summary of the management methods used by the Project: 200 entrants, giving the nation's corn growers a comparison of their own management practices with those of other top producers in the country.

Chester Co. youth agent appointed

Thomas E. Mitchell has been appointed to The Pennsylvania State University's Cooperative Extension Service staff as an assistant Extension agent working with 4-H and agricultural programs in Chester County.

Dr. Thomas B. King, Penn State associate dean for extension, who announced the appointment, said that Mr. Mitchell began his educational duties January 2.

Prior to his appointment to the Penn State staff, Mr. Mitchell worked part time for the Penn State Agronomy Research Center and for the Murray Shield Construction Co.

He is married to the former Mary Lou Altman, of RD6, Greensburg. His mother Mrs. Adda Mitchell, resides at RD1, Millerstown.

Farmers to plant more corn in '76

ANNAPOLIS - Maryland farmers report they intend to plant more corn this year, cut back on plantings of soybeans and barley, and keep their oats acreage equal to last year according to the first 1976 planting intentions report issued by the Maryland Crop Reporting Service, a cooperating agency of the Maryland Department of Agriculture.

A January 1st survey of Maryland farms indicates that farmers intend to plant 690,000 acres of corn for harvest this year up by 7 percent from last year's harvest acreage of 645,000 acres which produced an all-time record crop.

Soybean acreage according to farmer's reported intentions, will drop 15 percent to 275,000 acres and barley acreage will decline 3 percent to 110,000 acres from the 1975 plantings.

Oats plantings are expected to be 28,000 acres equal to the 1975 figure.

Earlier, the Crop Reporting Service released wheat planting intention figures for Maryland which show that 150,000 acres of winter wheat were seeded, a crop of 12 percent from year ago plantings.

Olde Homey Hints

To dye wood floors, a mixture of the inside bark of the red oak was used. A dark color was set with copperas. After the dye was applied and let dry, the floor was wiped with a weak lye. Finally, the floor was rubbed with a waxed brush.

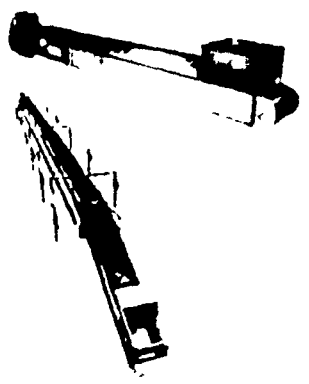
PATZ

MODEL 101 FEEDER AND CONVEYOR

Here's why the 101 is be coming Patz most popular feeder

- Feed can be deposited anywhere along the feeder
- Feed is distributed along the bunk from above by a conveyor with a tapered bottom
- Can be used inside or outside
- Chain and flites move at 117 feet per minute delivering up to 56 bushel of feed to the bunk each minute
- Can elevate feed and convey with optionals
- To fit your requirements the 101 can feed in one or two directions convey and feed in one or two directions or just convey

Feature for feature that's why farmers are selecting the Patz model 101 feeder and conveyor



See your PATZ Dealer today

How much is this planter worth?

A little pencil pushing and you could easily come up with a figure of about $400 an hour. That's what an efficient, working planter can be worth to you in the peak of the planting season. Will you spend part of that now to make sure your planter works when you need it? Call our Service Center for an appointment.

IT MIGHT PAY YOU TO TRADE YOUR PLANTER THIS YEAR.

COME IN AND SEE US,
YOU WILL BE SURPRISED HOW LITTLE IT WILL COST YOU TO TRADE.

WATCH FOR WINTER WARM UP DAYS

PLUS TYPE A AND MILK DOUBLE PLUS BULL

The WORTHY MASTER daughters are tall and sharp. They are clean-cut cattle that stand taller in the front end than they do in the rear end. Udders are well attached fore and rear, with strong median support and proper teat placement. The dairymen who like Worthy Master best are those who are milking his daughters. His maternal sister, Ecraso Topper Shela, made an Ohio State record with 36940 lbs. milk. This is the bull to use on short cattle that need more "daylight" under them.

AGWAY

Grow-Power Service is the fast, easy, labor-saving way to apply supplemental nitrogen and certain pesticides No product to handle. No equipment needed. No time lost And you buy only the actual amount of nitrogen you need per acre.

For two-in-one economy, Grow-Power Service can handle Agway Nitan nitrogen plus certain herbicides for a twice-over job in a single trip. Use your own pesticide or ask Agway to provide it for you.

Put Agway Grow-Power Service to work for you this spring

Here are some of the ways it can help save you time and boost crop production Use it to.

- Topdress Agway Nitan on oats and other small grains in early spring for maximum crop response
- Meet the nitrogen needs of your corn crop and add weed-killing clout if you wish
- Knock out broadleaf weed competition in spring-seeded alfalfa stands, oats and other small grains
- Gain fast control of alfalfa insect pests to help you cut more protein per acre

Whatever the need, your Agway man will help make sure the product is right for the job; and right for the weed spectrum on each field, utilizing the herbicide or combination of herbicides that will meet your management requirements.

Most Agway stores are equipped to provide you with Agway Grow-Power Service. But seasonal demands are heavy and careful scheduling is required. If you haven't already completed your application plans, call Agway now to see how time-saving, labor-saving Grow-Power Service can help you this spring.

Pat Krall, Lebanon; Linda Franz, Lancaster and Roxanne Shermeyer-Price, York; serve area extensions as youth agents.

Youth agents coordinate 4-H work in area

By SALLY BAIR
Farm Feature Writer

The 4-H programs in Lancaster, Lebanon and York counties may never again be the same. In each county a capable, enthusiastic young woman is having an impact on the program.

Mrs. Linda Franz, Miss Patricia Krall and Mrs. Roxanne Shermeyer Price are all Extension Youth Agents, and as such are shouldering a large share of the responsibility for the 4-H program.

Except in urban areas, the position of youth agent has been in existence less than three years, so each woman is breaking new ground. Previously, all the 4-H work was done by home economists and agricultural agents along with their other responsibilities.

Lancaster County's Linda Franz, the newest agent, expresses her opinion about the job, "It is to coordinate the county program, to take all the separate parts and make it a whole program."

In York County Roxanne says, "My main responsibility is to organize the 4-H program in the county. I am the coordinator, and although the staff still shares responsibility for individual events, I make sure that things are being taken care of."

Pat says she thinks of her job as being three-fold. "Part of the job is to plan, conduct and evaluate 4-H events and activities. It is also to expand the 4-H program and recruit new leaders and part of it is servicing leaders." She adds, "Although it is a youth position, it is primarily serving adults in a youth program."

For Roxanne and Pat, their new positions are really extensions of their 4-H experiences in their counties. Roxanne lived in the Dover area and was active in 4-H in York County for nine years with cooking and sewing projects. After graduating from Mansfield State College she worked for three months as a management trainee in the Bon-Ton Department store and then was hired for her present job. In the beginning the position was funded by the Concentrated Employment Training Act (CETA) for about eight months, and then the funds came from the county. She has been on the job for two and a half years.

Roxanne says her 4-H background has been a tremendous help to her as she proceeds with her work. "The program was very familiar to me - I knew both the good and bad points. I feel I can relate to the leaders easier."

Pat, who spent ten years as a Lebanon County 4-H'er in home economics and dairy projects, said, "I had good memories about 4-H, and its' a help to me now." "I'm glad I made the choice - I had an idea of the type of job it would be. It is interesting with a lot of variety." She said she also knew many other agents from her 4-H work.

Pat had worked for two summers for the Lebanon County Fair Association, and she said that too was a good introduction to her present position. She said, "As a result I know a lot of people and I picked up a lot about 4-H work." Pat graduated from Millersville State College in elementary and special education.

Linda had two years of 4-H experience in her native New York state, but admitted that she had not been really involved. She was also originally hired with funds from CETA last April, but since January her position has been funded through Penn State. She is a graduate of the State University College of Buffalo.

Now that Youth agents are on a par with home economists and agricultural agents Roxanne says, "It shows that 4-H is as important as the other programs."

It does not escape notice that the youth agents are all female. Is that significant? Each one laughed and said it meant nothing - and pointed out that there are men in that position elsewhere.

Linda said, "Some people were surprised a woman got the job. It just happened." Roxanne said, "I really don't know. I think the previous 4-H experience helped me."

Homestead Notes

"There are men agents in other counties," Pat said, "but there are more girls who are active in the 4-H program and maybe that carries over to adulthood."

Pat has been on the job for slightly less than a year, but she has participated in some new approaches. Last year for the first time Lebanon County participated in a week-long camp with Schuylkill County, and had 51 campers. Pat said, "All the kids really enjoyed it. The teen counselors planned and carried out the whole program."

Another innovation has been the creation of a 4-H advisory committee which evaluates and sets program goals, according to Pat. There are 12 leaders on the committee representing different areas of 4-H. Total enrollment is 1542, with 150 leaders.

Pat is involved in adulat and teen leader training, planning recreational activities, training participants in demonstrations, and helping find coaches for the judging teams.

And Pat has some new ideas she would like to implement. One thing she hopes to develop is a leader handbook which would contain resources for leaders - where clubs can tour, educational programs which are avilable and where to obta visuals.

A special interest is in developing activities geared for t 11-13 age group which is the highest drop-out age for 4-H'e Pat said, "You need to challenge, them, to get them ov those years until they are old enough to attend region events."

Another priority is "to learn how to best service leaders Pat said, "I need to know how I can best help them." And, course, she said, "We would like to expand our program Linda Franz concurs with Pat in saying, "I don't wo directly with the kids, except in the case of county counc and special programs."

In working with leaders Linda says one of the mai problems is proper and enough communication. "Leade often aren't aware of what they can get to help them. Mar clubs just don't realize what is available."

To help correct this, Linda has instituted a 4-H newslette which will go to all 4-H'ers in the county, with a cover lette directed at all leaders. In Lancaster the enrollment is near 3,100 4-H'ers, and 300 leaders distributed among 82 club

Linda, said, "I'm asking for lots of comments an suggestions about the newsletter, and I hope we get com ments about the 4-H program in general."

Something else Linda hopes to accomplish is an im provement in leader training. She said she feels this trainin is especially important with new leaders in new clubs, an hopes it can be changed to really inspire them with the ide and spirit of 4-H.

Organizing new clubs is also an interest for Linda. S said, "A lot of places are spotty in 4-H. Probably the best ide in starting new clubs is to have community clubs."

Linda would also like to work harder in telling the 4-H story. She said she is always surprised by the number o people who don't know what 4-H is, and hopes to spread th word through activities like 4-H Expo which will be held fo the second time this March at Park City shopping mall.

Roxanne agrees that the 4-H program needs more publicit and has this as one of her primary goals. She said she woul like the public to know more about the variety of 4-H ac tivities and the more than 120 projects from which 4-H'er can choose. She said, "Sometimes I get calls saying 'I'd lik my boy to be in 4-H but we live in town and don't have room for a steer.'" Roxanne said she hopes to spread the word tha there are projects to fit every situation, and it's not all "cows and cooking."

One public relations activity with which she has been in volved is setting up petting zoos. She said often this is a child's first encounter with live animals, and it is certainly a learning experience for them.

Country Corner

Labeling has changed our shopping routine

By MELISSA PIPER

Trying to prepare a meal these days has become a challenge between the housewife and the scientists! If you've read the nutritional label on a box, can, jar (or reasonable facsimile thereof) lately you'll know what I mean.

Reaching for a box of pudding mix, the other day, I gasped loudly as I read the ingredients. Not one sounded familiar, except for several four syllable chemical names which twinged a slight hint of remembrance But, reflecting on the brown masses of glop which used to corrode my test tubes in organic chemistry, I finally threw the box back into the cupboard and reached for another substitute!

Since it became mandatory several months ago, nutritional labels have become commonplace in our society and many more shoppers are taking the time to read such information before they buy a product. A trip to the supermarket has almost become a college course between the calculators for figuring price per unit and interpreting the calories per gram. Many weekly shoppers have already gained their "bachelor's degree" in food science which includes a good working knowledge of math, chemistry and biomechanics!

Being deluged with such a variety of processed and prepackaged goods has really made nutritional labeling necessary and helpful for knowing just what ingredients and in what proportions they are included.

The information on protein, fats, carbohydrates and calories also serves a purpose for the shopper who wants to select the products which best suits her needs.

Labeling and nutritional information has also made us realize that many of our foods which seem like everyday creations have really become "children the test tube." Spawned from artificial color, artifici flavoring, texturized fiber, molded for specific shap and even to the point of capturing the real odor of th product! Reflecting on that aspect, of the food we e is like reading a chapter from "Space 2300".

I certainly have mixed emotions about nutrition labeling and yet I suppose that we're probably bett off with it, however reading the cereal box in th morning used to be more fun when they ra promotions for measuring spoons instead of ho many calories I was eating with or without eig ounces of milk.

Visiting a supermarket about once a week, I'm st striving to get my degree in food science and ju about the time I've mastered the whole routine, th metric system will have become a law and I'll have relearn the whole system!

Youth agents

(Continued from Page 42)

Roxanne also works with the 4-H Advisory council which evaluates the program, suggests changes and makes policy decisions regarding 4-H work.

In talking about her work with leaders she stressed, "The volunteer leaders are the backbone of the 4-H program." In York County there are 2200 members, 45 clubs and 200 leaders.

She said, "I would also like to expand the program where there are no clubs, and I would like to start more traditional 4-H programs in the city. It is the town kids who need something constructive to do."

During the three interviews there was quite a lot of talk about "traditional 4-H," but every case the youth agents pointed out that 4-H is becoming more and more non-traditional.

Linda said, "To some leaders, 4-H is what it always has been. But 4-H is changing. Some clubs offer a much wider variety of projects, and many are developing their own projects. We encourage them to try new projects, especially if they have a resource person to teach the subject matter."

Pat agreed. "4-H is growing and taking new directions. It can be adapted to anybody - it is so flexible. The experience really can be whatever you want it to be; the possibilities are almost endless." She explained that projects which have not been in existence before or have no project book are called "self-determined projects" and can be geared to fit the needs of any club.

Roxanne said that in York County they encourage projects which are non-traditional. Pottery, leathercraft, ceramics and macrame are just a few of the new ones. She talks about "create a project" and said last year there was a project on cooking with turnips. She said, "A project can be anything that interests the kids.;; Project requirements for those innovative programs are set in consulation with leaders and youth agents.

Roxanne said, "Some of the projects have been around for years and have never been revised. Since the age limit has been lowered to eight, some projects don't work well with younger members. But I think 4-H is coming around. It is growing as the world grows and adding new activities and projects geared to today's young people."

All agreed that the eight year old offers some special challenges. Roxanne said, "The younger members are willing to learn. They see activities and see their older brothers and sisters participating and are eager to join." But, she said, "We need to create projects and activities for eight year olds, on their level. It really takes parental guidance for younger members."

Linda says, "Many of the leaders don't like having the lower age limit. Many eight year olds are not ready."

In Roxanne's conversation, she repeatedly refers to the "4-H family." The monthly newsletter is sent to "families" and there is a "family fun night" in the spring. Why all the talk of family? "We feel it is important to get the whole family involved. The parents must be behind the child to get them to meetings, invite the club to meet in their homes and to help with the projects. If the parents are interested you have a good 4-H'er."

Girls have always shown cows and livestock, so they participated as equals in the 4-H program long before the women's movement went about trying to raise their consciousness. But some things are changing. One project which has shown a great increase in girl enrollments in the past few years is the handyman project, which involves primarily carpentry, Roxanne says. There may be more interest in crops and small livestock, but these have always had some girl enrollments.

Girls also dominate the total 4-H picture, Roxanne says that among younger 4-H'ers there are about equal numbers of boys and girls but somewhere the situation changes and now in York County there are twice as many boys as girls. Linda says the same is true in Lancaster County and adds, "Sometimes I think girls are more joiners than boys. There are also more clothing and cooking clubs. But girls have always been accepted as equals in 4-H. It is the boys who are almost discriminated against," Linda says, because there are so few boys taking traditionally female projects. She added, "Boys are welcome to take any projects and in certain clubs they are encouraged."

There is at least one cooking course designed primarily for boys, and Roxanne says there are often boys interested in candle-making, leather craft and bicycle and recreation projects. She said, "We had one boy who took the beginner sewing project and made terry cloth bedroom slippers. He got a blue ribbon at the York Fair and hopefully this will encourage him to continue."

Pat says there are some boys in cooking projects in her county but points out, "Leaders think of boy's projects and girl's projects."

Roxanne is concerned about a great exodus of boys at age 13 and cannot understand exactly why. "Perhaps they are needed more at home as they get older. It is hard to put your finger on it. But we do have a lot of older boys."

But keeping youngsters in the 11-13 age group is of concern to all three women, and is not confined to just boys. Linda said one reason may be the wide age spread that is found in some clubs. One solution she said might be to use the teen leader project more.

Each county has an urban 4-H program, most of which is carried out under the Expanded Nutrition Education Program. In York there are nine clubs with 193 members who meet year round. The program is geared primarily to nutritional education, but last summer one club had a garden and encouraged members to grow plants at home.

In Lancaster the program is mostly a summer one, with the exception of one year-round inner city club. They have about 450 members.

And in Lebanon the program is also conducted in the summer in conjunction with the seven city playgrounds and three housing porjects. They reach 1,000 young people at their peak. The projects are such that they "can be completed in a short time," Pat said. A long range goal is to eventually have traditional 4-H programs in the city.

The agents agreed that it is helpful to share ideas among themselves, because as Pat says, "No two county programs are the same."

But the universality of the 4-H program is in its goals: learning new skills, meeting new people, handling responsibility, accepting the challenge of competition. Roxanne says, "The 4-H experience helps get young people ready for adult life."

Coordinating a program which boasts the size and complexity of 4-H is a challenge. Pat, Linda and Roxanne set about the challenge with enthusiasm and interest that is hard to match in other professions. Through their efforts 4-H will grow and prosper in Lancaster, Lebanon and York counties, and the members as well as their communities will be the richer.

Berks women's board meets

Ann Yanos, president of the Berks County Society of Farm Women announced new committee appointments at a meeting of the executive board held in the County Agricultural Center. Betty Wessner and Joyce Deisemann will serve as chairmen of the county scrapbook contest.

Donna Haas was appointed chairman of the county convention with vice presidents of groups 1, 3, 4, 6, and 9 serving as her committee.

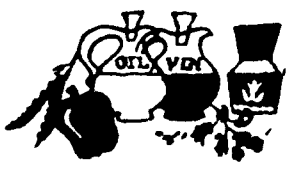
Plans are under way for a county-wide hoedown to be held March 27 at the Shartlesville Fire Hall. Helen Shirey is in charge of arrangements with Barbara Kintzer responsibile for refreshments. Tickets will be available from any member.

Many members plan to attend the annual Spr) Rally in Gettysburg May 12.

Thirty seven Berks County members attended the state convention in Harrisburg January 5 and 6.

Know Where the Activities Will Be?

Read the Farm Women Calendar.



Society booklets due

To this date we have received only a few program booklets for the Farm Women Societies in Lancaster Farming's coverage area. We would certainly like to announce your meeting dates and activities but cannot do this without your help. Please be sending in either the booklets or program dates. Two months of 1976 will soon be gone and the activities are many for this year. We'll be looking forward to receiving your schedule of events! Send to: Women's Editor, Lancaster Farming, Box 266, Lititz, Pa. 17543.

Junior Cooking Edition

Several brothers and sisters have contributed to the Junior Cooking Edition this week. Dessert recipes still seem to be a favorite with the younger set!

For interesting recipes from long ago see the Home on the Range edition.

Chocolate Chip Oatmeal Cookies

2 cups shortening
2 cups brown sugar
2 cups granulated sugar
4 eggs
4 tablespoons water
2 teaspoons vanilla
3 cups flour
2 teaspoons soda
2 teaspoons salt
4 cups chocolate bits
1 cup chopped nuts
6 cups oatmeal

Cream shortening and add sugar gradually. Beat in eggs until fluffy and stir in water and vanilla. Add the flour, soda, salt and oatmeal. Add chips and nuts. Bake at 375 degrees for 12 minutes.

Linda Rutt
Mt. Joy, PA

xxx

Soda Crackers

7½ cups flour
1 teaspoon soda
3 teaspoons baking powder
3 teaspoons salt
1 cup vegetable shortening

Mix the dry ingredients in a large bowl. Cut in shortening and add milk and water to make a soft dough. Roll out very thin and prick with fork and cut.

Alice Leinback
age 13

xxx

Oatmeal Crunchies

1½ cups shortening
1½ cups brown sugar
1½ cups granulated sugar
3 eggs
2 teaspoons black walnut flavoring
2½ cups flour
1½ teaspoons salt
1½ teaspoons soda
3 cups oatmeal
¾ cups chopped nuts

Cream sugars with shortening. Add eggs and flavoring. Mix well. Add sifted dry ingredients then the oatmeal and nuts. Mix well. Drop from a teaspoon onto an ungreased cookie sheet. Bake at 350 degrees.

Allen Leinbach
age 10

xxx

Barbequed Hamburger

2 pounds hamburger
1 onion
½ cup catsup
2 tablespoons brown sugar
2 tablespoons prepared mustard
1 teaspoon Worcestershire sauce
1 teaspoon salt

Simmer 20 minutes and serve with hamburger buns.

Miriam Nolt
age 7
East Earl, Pa.

xxx

Peppermint Candy

1 egg white
2½ cups powdered sugar
½ teaspoon peppermint flavoring
2 teaspoons butter

Mix and add food coloring. (no further instructions included.)

Louella Nolt
age 9
East Earl, Pa.

xxx

Rice Cereal Candy

2 cups brown sugar
1 cup heavy syrup
½ cup cream
¼ cup butter

Cook to soft ball stage and add a pinch of soda. Pour over puffed rice cereal and mix well. Cut when cooled.

age 6
East Earl, Pa.

xxx

Dog-hikers

While out for his Sunday drive the motorist noticed a young lad seemingly running from six large canines. "Looks like you could use a ride," said the driver. "Hey, thanks a lot," replied the youngster. "Most people won't stop and give me a ride because I've got all these dogs with me"

Food marketing alert

As of mid-January, the supply situation in February is expected to look like this . . .

Red Meats

Beef . . . plentiful, with Feb. production rates averaging near Jan. levels and about 5 percent above a year earlier, about 13 percent above the 1973-75 Feb. average. Output of fed beef will be trending upward for next few months

Pork . . . light. Feb. production rates should be near Jan. levels, but averaging about 15 percent under a year earlier and well below the 1973-75 average for month.

Poultry & Eggs

Broiler-fryers . . . adequate. Record Feb. production is expected to be about 7 percent more than a year earlier and 5 percent above latest 3 year average.

Tuckey . . . adequate. New crop marketings in Feb. should be some 30 percent ahead of Feb. 1975 and nearly one-fourth more than the 1973-75 monthly average. Feb. 1 cold storage holdings are estimated to be about 30 percent less than a year earlier and about 20 percent under the 1973-75 average. This means that total Feb. turkey supplies will be down about one-fifth from a year earlier.

Eggs . . . adequate. Feb. output is likely yo be slightly above a year earlier and a shade less than the 1973-75 monthly average.

Milk & Dairy Products

Milk and dairy products . . . adequate. Dec. milk production rose 2.1 percent from a year earlier and was 1.2 percent above the 1972-74 monthly average. While production should continue to increase seasonally, continued strong demand for cheese and ice cream could make less milk available for the production of butter and nonfat dry milk in comparison with Feb. 1975 output. Nov. 1975 output of butter and nonfat dry milk products was about 4 percent under a year earlier and 3 percent below the previous 3-year average. American cheese production was about 0.5 percent above a year earlier and almost 1 percent ahead of the previous 3-year average. Commerical dairy product stocks in early Dec. continued to decline from year-earlier and 3-year averages. Examples: butter, 75 percent; under a year earlier and 65 percent below the 3-year average; American cheese, 25 percent and 5 percent nonfat dry milk, 70 percent and 50 percent.

Fruits, Vegetables, & Nuts

Fresh apples . . . plentiful. Nov. 30 cold storage stocks were 16 percent greater than a year earlier and 26 percent larger than the most recent 3-year average.

Fresh winter pears (mainly D'Anjous) . . . plentiful. Nov. 30 cold storage holdings were 15 percent above a year earlier and 33 percent more than the 1972-74 average.

Frozen red tart cherries . . . plentiful. Nov. 30 stocks were up 25 percent from a year earlier and 27 percent greater than the 1972-74 average for the month.

Fresh citrus fruits and juices . . . plentiful, Early, mid-season, and Navel orange production to be slightly above last season and 7 percent more than the latest 3-season average. Grapefruit crop expected to be record large, up 14 percent from last season and 9 percent larger than the most recent 3-season average. Florida frozen concentrated orange juice processors' stocks Jan. 3 were 20 percent above a year earlier and 37 percent more than the latest 3-season average.

Canned non-citrus fruits . . . plentiful. The 1975 pack was slightly smaller than the previous year, but total supplies are heavier because of larger carryover stocks.

Raisins . . . plentiful, because of heavy production in 1975, and 1974. Dried prunes . . . plenfitul. Estimated 1975 crop is larger than last year's large production.

Processed vegetables . . . plentiful. Frozen vegetable stocks last Nov. 30 were 4 percent larger than a year earlier and 16 percent larger than the 1972-74 average for the month. Supplies of frozen sweet corn and green peas were 17 percent higher than in 1974; frozen lima beans and snap beans, 16 percent and 9 percent more than in the same period. Frozen potato inventories last Nov. 30 were slightly greater than a year earlier, and exceeded the latest 3-year average by 12 percent. Canned sweet corn stocks last Dec. 1 were 50 percent larger than a year earlier and 19 percent greater than the 1972-74 monthly average. Dec. 1 supplies of canned green peas were 40 percent heavier than a year earlier and 37 percent ahead of the latest 3-year average.

Fresh potatoes . . . adequate. Dec. 1 stocks were 4 percent under the record level of a year earlier, but 7 percent larger than the 1972-74 average for the month.

Peanuts . . . plentiful. Commercial stocks last Nov. 30 were 8 percent greater than a year earlier, and the 1975 crop was record large. Almonds . . . plentiful, because of a large carryover from the record 1974 crop. Estimated 1975 production is about 27 percent below that of 1974. Walnuts . . . plentiful. A record 1975 crop should top 1974 output by about 22 percent. Pecans . . . plentiful, with 1975 production about 68 percent greater than 1974's small output.

Grains & Legumes

Rice . . . plentiful. Record 1975 production was 14 percent above a year earlier and 32 percent more than the 1972-74 average. Dry beans . . . plentiful, though last year's production was 15 percent less than the record 1974 crop and 6 percent under the 1973-74 average. Dry peas . . . plentiful, because of large carryover from 1974 production.

Wheat . . . plentiful. Production in 1975 was record high, 19 percent ahead of the record 1974 crop and 27 percent greater than the latest 3-year average.

Corn . . . plentiful for food use. Record crop harvested was 25 percent larger than a year earlier, and nearly 10 percent above the 1972-74 average.

Home on the Range

To answer our request for the granola cereal recipe, several readers have sent along their variations and we thank all those people who took the time to help us out. Also this week we are featuring the first series of recipes from early Pennsylvania cookbooks. Although several of the measurements do not coincide with today's we have printed the recipes as they were originally done. If you'd like to try them perhaps a measuring guide may be in good order and you'll see why . . . A very special thanks to Mrs. Mary Wanner of Ephrata, Mrs. James Renner, Hatfield and Mrs. W. Haag, Malvern, who sent them in.

From Michigan we also received a recipe for an "Impossible Pie". That certainly sounds interesting!

Granola Cereal

4 cups quick cooking oatmeal
3 cups whole wheat flour
1 cup wheat germ
1 cup white flour
1 cup brown sugar
1 tablespoon salt
1 cup chopped nuts
1 cup cooking oil
½ cup water

Mix dry ingredients, add water and oil and mix well. Mixture should be crumbly and more water can be added to make bigger crumbs. Put into two large flat pans and bake in slow oven turning every 20 minutes for 1½ hours. Cool and store in airtight container. For variations add 1 cup fine coconut or 1 cup raisins after cereal is browned.

Edna Risser
Stevens, PA

xxx

Impossible Pie

4 eggs
½ stick butter or oleo
1¾ cups sugar
½ cup quick biscuit mix
2 cups milk
4 ounces coconut

Beat eggs and melted butter with sugar, biscuit mix and milk. Continue beating during these additions. Stir in coconut. Pour in 8 inch pie pans (ungreased). Bake at 350 degrees for 35-40 minutes or until knife inserted comes out clean. (Sent to Mrs. Saylor by her daughter.)

Mrs. Muriel A. Saylor
Elizabethtown, PA

xxx

Applesauce Custard Pie

1 cup applesauce (unsweetened)
1 cup milk
½ cup sugar
2 eggs
1 teaspoon flour
1 teaspoon melted butter
1 teaspoon vanilla
½ teaspoon cinnamon
1 unbaked 9 inch pie shell

Put applesauce, cinnamon, melted butter, sugar and flour in a deep bowl. Beat eggs together in a separate bowl then add to them the milk and vanilla. Add to the first mixture and blend well. Pour into pie crust and bake at 350 degrees for 45 minutes.

Mrs. W. Haag
Malvern, PA

xxx

Queen's Cake
From 1888 Cookbook

1 pound sugar
1 pound flour (sifted)
1 heaping teaspoon baking powder
¾ pound butter
5 eggs
1 (gill) of sweet cream
1 teaspoon extract of nectarine
1 tablespoon water
1 grated nutmeg

Cream sugar and butter and add the eggs beaten very lightly. Add cream, flour and flavoring.

Taylor Cake
1888 Recipe

7 eggs beaten separately
beat the yolks with 2 pounds of sugar
1½ pads of butter
7 coffee cups of flour
2½ teaspoons baking powder
1 pound currants
1 pound seeded raisins
3 nutmegs
1 tablespoon cinnamon
1 pint of milk
add the whites of eggs

Combine ingredients and bake.

Mrs. Mary Wanner
Ephrata, PA

xxx

Apple Crisp

Put in a greased casserole:
1 quart sliced apples
1 tablespoon lemon juice
Mix for crumbs:
one-third cup flour
½ cup brown sugar
1 cup oatmeal
one-third cup butter
1 teaspoon cinnamon
½ teaspoon salt

Put crumbs over the apples. Bake at 375 degrees for 30 minutes.

Mrs. Leroy Kerschner
Lenhartsville, PA

xxx

Lemon Strip Pie
18th Century

Filling:
1¾ cup water
¾ cup granulated sugar
½ cup table sirup
½ teaspoon salt
1 beaten egg
rind of 1 lemon
one-third cup lemon juice
5 level tablespoons cornstarch mixed with ¼ cup water

Mix all together and bring to boiling and simmer five minutes. Cool slightly and divide in crusts.

Strips

3 tablespoons granulated sugar
1 cup flour
2 teaspoons baking powder
¼ teaspoon salt
¼ cup butter

Blend all together as for pie pastry. Use about 6 tablespoons of milk to moisten and keep soft. Form into a ball and roll. Cut 8 - 1 inch strips and place on filled crusts about 1 inch apart. Bake 45 minutes until filling bubbles and strips are brown.

Mrs. James Renner
Hatfield, PA

xxx

Salad Dressing
100 Years Old

½ teaspoon mustard
2 tablespoons sugar
1 teaspoon cornstarch
¼ teaspoon salt
⅛ teaspoon pepper
1 egg
1 tablespoon vinegar
½ cup water

Mix ingredients and cook until thickened. Add 1 tablespoon butter and beat. Cool and use over lettuce.

Mrs. W. Haag Malvern, PA

Dairy club meets

A meeting of the Oxford 4-H Dairy Club was recently held at the home of Robert Mason. Elected as officers for the coming year were: Susan Pepple - president; Eddie Breckbill - vice president; Gayle Hayes - secretary; Alan Mason - treasurer; Bob Lamborn - news reporter and Charles Hayes - game leader.

The club will be meeting every third Monday at 7:30 p.m.

York Co. Society 6

Society of Farm Women Group 6, Manchester, York Co., recently met at the home of Mrs. Raymond Wilt. In the absence of the Pres., vice pres. Mrs. Harold Gross presided.

Mrs. C. A. Musser led devotions followed by the Lord's prayer, pledge to the flag and singing "Brighten the Corner Where You Are".

Ten members answered the roll call by telling something that made their Christmas especially happy.

Mrs. Harold Gross gave the report on the state convention held recently in Harrisburg. She said 15 of the 17 organized counties were represented. Mrs. D. Wilbur Erb was elected to the office of State President.

A reading entitled "New Years Resolutions" was read.

Mrs. Joan Taylor read a poem entitled "The Good Old Days" after which everyone enjoyed a "Dear Abby" program.

The next meeting will be held Feb. 11 at the home of Mrs. Marian Hewitt. Each member is to bring some thing red and eatable to be

Society 29

The January meeting of Farm Women Society 29 featured a cake decorating demonstration at the home of Mrs. Jack Garner, Elizabethtown R1.

Mrs. Robert Kauffman, Elizabethtown R1, decorated a typical birthday, anniversary, baby shower and doll cake before twenty-two members and guests.

Mrs. Gerald Erb, president, announced that the Spring Farm Women Rally will be held in Gettysburg at the Sheraton Inn on May 12, 1976.

On February 21, members and husbands will attend a Hockey game at Hershey Sports Arena.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

About Fair Credit Billing Know Your New Rights

Thanks to the new Fair Credit Billing Act, the 35 million American families now using credit cards may shortly find better and more understandable service.

The stated purpose of the act is "to protect the consumer against inaccurate and unfair billing and credit card practices."

To ensure that fair practices are enpolyed across the board, all credit card issuers are now required to:

1. Credit any payment to your account the day it is received, so that you won't run up finance charges after the bill has been paid.

2. Mail your last bill at least 14 days before payment is due, if your account includes a free period before finance charges are added.

3. Provide you with a two-page notice of your new rights under the law twice a year and on request.

4. Follow specific procedures in resolving your complaints about billing errors.

5. Provide you with an "inquiry address" on every bill.

To resolve a complaint, you should write to the company (at the "inquiry address") within 60 days of the postmarked bill. The creditor than has 30 days to acknowledge receiving your complaint and 90 days to resolve it. During this time, you do not have to pay the amount in dispute, but the creditor may continue to include the amount in your bills and indicate the finance charges. It may not report you a credit bureau as deliquent until the complaint is resolved.

If it turns out that a mistake has been made, the error must be corrected, and any finance charges adjusted to the correction. If the creditor is right, you pay the disputed amount plus the finance charges added.

A separate item included in the new regulations pertains to payment for "shoddy" merchandise. If you use your credit card to buy an item you later find to be defective, and if the merchant refuses to replace or repair it, you may withold payment from the credit card issuer - after due notification - provided that the purchase price was more than 50 dollars, that you made the purchase in your home state or within 100 miles of your home, and that you have made a good faith attempt to resolve the problem with the merchant.

And, finally, in response to complaints of cash customers that they were being asked to subsidize the financial costs of a credit system that didn't use, discounts for cash purchases of goods and services may now be granted be merchants - up to 5 per cent of the tag, posted or advertised price. This is not to say, of course, that all merchants will offer the allowed discount. To find out if the cash discount is available, look for a sign which must be posted prominently in the merchant's establishment.

Tips on Collecting Bicentennial Souvenirs

Bicentennial souvenirs are found everywhere - along with historical and political memorabilia.

But may collectors have trouble knowing exactly what they are buying. According to Extension specialists at The Pennsylvania State University, a Federal Trade Commission law can help protect consumers from being deceived.

According to the Hobby Protection Act, all imitation coins, paper money and medals manufactured after 1973 have to carry the word "Copy" in the ad. When buying political buttons or stickers, the date of their manufacture must be marked.

If you buy misrepresented Bicentennial momentos you can report your problems to: "Hobby" Division of Special Statues, Federal Trade Commission, Washington, D. C. 20580.

Society 1

Mrs. Karal O'Neal entertained Society 1 of York County recently. Mrs. Lloyd Rishel presided at the business meeting.

Fourteen members and one guest were present at the meeting with delegates to the state convention giving their reports.

Mrs. Clara Butcher gave two readings which were followed by a discussion on the topics.

Society 1 plans a quilting meeting at the home of Mrs. James Craft for the future.

The next meeting will be held at the home of Mrs. Ethel Baker with Mrs. Elizabeth Shenberger in charge of the program.

Society 21

Farm Women Society 21 met recently at the home of Mrs. Parke Ressel, with eleven members and one guest present. The roll call was answered by members giving an old fashioned remedy.

On the Sunshine committee for 1976 are Arlene Kreider, Ann Brown and Virginia Rineer.

On Ways and Means - Joan Rohrer, Lois Aument, Labertha Tindall, Mim Delong and Jerry Arrowsmith will be serving.

Kenneth Derr from Quarryville gave an interesting history on the Amish with Mrs. Ressel giving a demonstration on rug braiding.

The next meeting will be held February 12, 1976 at the home of Mrs. Thomas Bradley.

FOOD BASKET

Buying Poultry

When buying poultry, look for the official USDA grade mark on poultry—it is your assurance of quality U S grade A poultry is the finest poultry available, but all inspected poultry is nutritious and wholesome food The inspection mark of the U S Department of Agriculture in the form of a circle is requred on all poultry sold across state lines

Ida's Notebook

Ida Risser

As income tax deadlines near, does your diningroom table become covered with assorted papers and bills or are you better organized than we are?

I'm only too glad to have Allen fill out the complicated forms. It is one of the times that I admit he has the brains in the family. Another time is when he discusses chemistry with the children. After all, he had enough credits in college to teach high school chemistry.

I'm glad we only need file once a year for taxes and also that the deadline falls in the winter season. Many people think farmers have no work in winter but all good farmers have plenty to do in the repair lines. And on a dairy farm the work never stops.

Last month I purchased a book which gives historical background on the Conestoga River watershed. It is approximately 50 miles long and at one time powered 400 forges, grist mills and saw mills. In the past the river was a source of electrical energy for small communities at Slackwater and Rock Hill. There is a picture in the book of Wolf's Mill at Brownstown (built by my great, great grandfather) which supplied electricity at a cost of $1.00 per month.

Within two or three miles of our farm, there are three covered bridges and a beautiful arch bridge and a large flour mill. Also, the remains of Henry Lemans Long Rifle Shop which forged guns from 1834-1887. Long ago there were many two or three story stone buildings for storing 300 pounds blocks of ice from the Conestoga. Straw of sawdust was used to prevent blocks from melting into one solid mass. It was then sold for about 10 cents for a 25 pound block.

Berks Co. Society 6

The Society of Farm Women, 6, met at the home of Mrs. Carl Herbein on January 20. Trooper Albert, of the Reading Barracks, Troop L, showed a film, "Making Homes More Burglary Proof." Seventeen members answered the rool call question. "Give a Safety Tip!"

The group will be serving refreshments at a sale on Saturday, February 21.

Five ladies, of our group, attended and reported on the State Convention held in Harrisburg on January 5, 1976.

Stanley Products will be sold, and orders given to any member to be brought to the next meeting at the home of Mrs. Merrill Hetrick, Limekiln, on Tuesday, February 17 at 8 p.m.

Society 4

Farm Women Society 4 recently met at the home of Mrs. Landis Huber with Mrs. John Gingrich serving as cohostess.

Devotions were lead by Mrs. Paul Troop and the roll call was answered by naming "how I earned my first spending money."

Program for the meeting was a talk given by Mary Ann Fisher who had espaced from Hungary as a Jew years ago.

Edith Musser gave a report on the state convention and named the state officers as well as relating information discussed at the event.

Farm Activities

Upcoming Events

Saturday, Feb. 7

Society 1 meeting at the Brunnerville Fire Hall at 1:30 p.m.

Wednesday, Feb. 11

Society 12 meeting at 1:00 p.m. for sewing.

Society 14 meeting at 1:30 p.m. for a tour of the Mennonite Historical Museum.

Society 6 of York County meeting at the home of Mrs. Marian Hewitt.

Thursday, Feb. 12

Society 21 meeting at 7:30 p.m. for a program on the president's ladies and valentines of yesteryear.

Young child workshop set

Dr. James Van Horn, Family Life Specialist, The Pennsylvania State University, will be the featured speaker in a very special workshop on "Communicating With Young Children" to be held on March 2, 1976, at the St. John's United Church of Christ Church, 232 East Market Street, Orwigsburg, PA beginning at 9:30 a.m. with another session in the afternoon at the Pottsville Mission beginning at 1:00-3:00 p.m.

Dr. Van Horn will explore ways of communicating with children. According to Van Horn, "by yelling, shaming, hurting, and so forth we do nothing to enhance the self-esteen or self-concept of the child."

The workshop is sponsored by the Cooperative Extension Service. Babysitting services will be provided. Reservations need to be made for the workshop by calling Mrs. Ruth M. Hand, Schuylkill County Extension Service, P.O. Box 404, Schuylkill Haven, PA 17972 - Telephone: 717-385-3431. Any interested persons may participate in this workshop. There is no charge.

Reservations must be in by Wednesday, February 25, 1976.

—Report any solicitor or salesman without proper credentials to the police

Before moving check plant rules

If you are the owner of house plants or a home gardener planning to move to another state, check first for plant quarantine regulations that may exist, cautions the U.S. Department of Agriculture's Animal and Plant Health Inspection Service (APHIS). The advice also applies to those visiting in other states, who may plan to bring back plants, bulbs and other items.

APHIS officials point out that the purpose of plant quarantines is to restrict the movement of plants and other articles that may harbor destructive pests such as insect eggs, grubs or nematodes. For a listing of "do's and don't's" when moving plants, write for a free single copy of "Moving? Traveling? Trading Plants." Address your request for the leaflet to: Information Division, AMS-APHIS, U.S. Dept. of Agriculture, 26 Federal Plaza, Room 1653, New York, NY 10007. Please include your Zip Code.

How Come?

Ever wonder why the ghost walks at midnight? It's easy—the last bus usually leaves at midnight

Italian sausage ingredients standardized

The product name, "Italian Sausage," represents a distinctive type of sausage to consumers, and to help maintain that identity, the U.S. Department of Agriculture (USDA) is adopting a new standard of composition for such products.

USDA's Animal and Plant Health Inspection Service +APHIS) said that Federal meat inspection regulations covering these products (currently labeled "Italian Brand Sausage") will be amended effective Dec. 31, 1976. According to APHIS processors will have until the effective date of the new standard to deplete present label inventories and to submit new labels for approval.

The complete standard was published in the Jan. 19 Federal Register.

Briefly, the new standard described "Italian Sausage" as an uncured, unsmoked sausage in casing or in link, bulk or patty form, containing at least 85 percent pork, or a combintation of pork and fat, the total of which contains not more than 35 percent fat; salt, pepper and either fennel or anise spices, or a combination of the two.

In addition, the sausage may contain optional ingredients appropriate for this product, such as spices (including paprika) and flavoring, red or green peppers, garlic, sugar, and onions. The product also may include beef or veal with appropriate labeling, such as "Italian Sausage with Beef."

Generally, under federal meat regulations, terms referring to a locality different than that in which the product is prepared may appear on the label only when qualified by the words, "style," "brand," or "type." When the world "style" or "type" is used, there must be a recognized style of product identified with and peculiar to the area represented by the geographical term. The product must possess characteristics of that style.

More than three years ago, APHIS published a proposed standard and sought the public's views to determine whether there was a recognized style for "Italian Sausage"; if so, what the characteristics are; and if, in the interest of consumers, a standard for this product should be adopted.

Comments received indicated there is a recognized style and generally supported the need for standardizing this product, APHIS said. In addition, the name "Italian Sausage" appears in general use in the United States by those who produce and consume it. Consequently, the terms "style" or "type" do not appear necessary and are not required on the label by the new standard of composition.

As a result of public comments received, there are several differences between the standard announced and the one initially proposed. They include:

-The fat limit in this type of sausage will be 35 percent, rather than the proposed 50 percent;

-Trichinae treatment of this product will not be required when pork alone is used since it does not have a cooked or ready-to-eat appearance. However, when pork is combined with beef or veal, or both, in the preparation of bulk-packed products or patties, the treatment will be required.

-Optional seasonings and spices are listed to allow for different formulations used in different geographical locations.

-Provisions are included for the formulation of "ItalianSausage" made only of beef or veal, with appropriate labeling, to provide for persons, who for religious or dietary reasons, cannot eat pork.

American horticulture discussed at Longwood

Dr. John M. Fogg will open Longwood Gardens' 1976 Wednesday Evening Horticultural Lectures when he presents "The Beginnings of Horticulture in America," on February 4, at 8:30 p.m. The slide illustrated lecture will be given in the ballroom off Longwood's great conservatories. Admission will be by payment of the day's $1.00 admission fee to the gardens.

Much of Dr. Fogg's presentation will deal with people and places familiar to residents of the Delaware River Valley. Consideration will be given to the establishment of gardens by James Logan and Christopher de Witt near Germantown, and to the achievements of Humphrey Marshall and William Darlington in Chester County, Pennsylvania. Emphasis will also be placed on the travels and plant introduction of John Bartram and his son, William, whose home lay on the Schuylkill River near Philadelphia.

Dr. Fogg is well qualified to speak on the horticultural history of the Philadelphia area. He did his undergraduate work at the University of Pennsylvania and returned to join its botany staff in 1926 after completing a Ph D. at Harvard University. From 1926 to 1965 he taught botany, and he served in administrative capacities as Dean of the College of Arts and Sciences from 1941 to 1944, Vice Provost from 1944 to 1953, and Director of the University's Morris Arboretum from 1953 to 1965. Since 1965 he had been director of the Arboretum of the Barnes Foundation in Philadelphia.

The conservatories at Longwood Gardens, featuring spring bulbs, acacias, and camellias, will be open for one hour before and after Dr. Fogg's lecture. Longwood is one of the finest display gardens in this country, and its conservatories and ground rival those of the greatest European gardens. It is located at the junction of U.S. Route 1 and Pennsylvania Route 52, northeast of Kennett Square, Pennsylvania. Longwood is open every day of the year, the grounds from 9 a.m. to 5 p.m., the conservatories from 10 a.m. to 5 p.m.

Bollinger cow tops 1000 mark

BRATTLEBORO, Vt. - An official production record exceeding a half ton of butterfat has been completed by Willow Maple Gay Annette 7630380 (VG), a registered Holstein cow owned by Willow Maple Farm, Newmanstown. This is the first time that "Annette" has achieved the 1,000 lb. butterfat production level in a single lactation. This record ranks among 5,041 similarly completed by Registered Holstein cows on official test.

The Pennsylvania Holstein's official record of production totalled 25,670 lbs. of milk and 1,070 lbs. of butterfat in 365 days. She started her lactation at the age of 4 years 5 months and was milked two times daily.

1910 soybeans raised eyebrows

Editor's Note: The following story, submitted by William Stoltzfus, is about his "Adventures in Growing Soybeans" when the crop was still very much of a novelty. Stoltzfus grew the "strange" beans in the early 1900's on his farm near Atglen. Now living in Wilmington, Del., he tells of all the curiosity, problems, and surprises which were involved in raising, harvesting, processing, and feeding the beans.

By WILLIAM L. STOLTZFUS

When we consider the millions of bushels of soybeans that are grown in the United States, the thousands of products that are made from some derivative of them and the large number of individuals that are employed in the manufacture of these products, then indeed it would appear as if some Rip Van Winkle had suddenly appeared after a long nap and had spoken of raising soybeans as an adventure.

However, when I planted a bushel of soybeans on my farm in Chester County, Pa. in 1910, it was indeed an adventure as I had never seen a soybean and did not know of anyone in our neighborhood who did.

I got a bushel of Ohio 9035 beans from a grower in Ohio and also 100 lb. of soil to inoculate the beans. (This was a large brown bean with many branches and more treelike than most of the varieties that are grown today.) The planting instructions I received were to use 20 pounds of seed per acre and plant about 10 days after corn planting time - which is still a good time to plant. To plant I used an old seven hole grain drill which planted 2 rows 28 inches apart, after closing up some of the spouts. I had some very favorable weather and in just one week the beans were coming through the ground. To inoculate the beans, the soil was run through the same spouts that were sowing the beans. The soil ran out when I was finishing the last round and the good results of the inoculation were apparent.

The beans were planted along the road and were quite a curiosity.

A number of farmers stopped and inquired as to what I was growing. One Saturday evening a young knight and his lady friends came driving down the road. She looked at the beans and asked, "What's that?" He gave one sweeping look at the small beans and promptly replied, "Strawberries!"

When it came time to harvest the crop, some of my troubles started. I was told to put them on a stack to cure out before threshing them, so I cut them in the morning with a mower when they were still damp so as to avoid shelling the beans. I then raked them up with an old-fashioned dump rake and put them on a stack to cure. The rake did a good job but also raked up some small stones which became apparent when we began threshing the beans. This made a lot of trouble.

I prevailed upon my neighbor who had a small hand-fed thresher, to do the threshing. After changing some of the pulleys so as to slow down the cylinder speed, we proceeded to thresh. This proved to be a very dirty job and when we were finished, my neighbor said, "Don't ask me to thresh soybeans again!"

The yield of the beans was good (about 30 bushel per acre) but about one fourth were broken or cracked due to a too fast cylinder speed. I cleaned the beans with a hand-turned cleaner as electricity in the rural areas was still quite a few years around the corner. I had separated the splits from the whole beans but now what was I going to do with them? I had a crop for which there was no market!

After some correspondence with an Ohio seed firm, I sold the whole beans for $1.60 a bushel, which was a fair price with corn at 50 cents and wheat at 75 cents a bushel.

Now I was rid of the whole beans but what was I going to do with the splits? The beans were supposed to be good cow feed and as I had a small dairy, I took a few bags of the splits to town to get ground. The miller fed the beans into the Monark Burr Mill about as fast as shelled corn but had barely gotten started when the mill stalled down completely. The beans proved to be rather oily and gummed up the works. After some delay, we got started again and by feeding the mill slowly, we finally got the grinding done. Then I was told, "These beans may be good cow feed, but don't bring any more around here to be ground!"

For our cow feed, we mixed equal parts of ground beans with cottonseed meal plus corn and cob meal to give the desired protein ratio. This made a rather heavy and unpalatable mixture and the cows did not eat it as readily as desired. Later we added bran and corn distiller grains to the mixture and the cows ate it better.

When our ground beans got all, then the problem was how to get more ground. We finally got the idea of mixing the beans with the ear corn. After weighing out the desired ratio of beans to ear corn, we put the ear corn in the bag first and then used the beans to fill out the empty spaces as needed. Since the ear corn was dry, this worked very good and we had no more grinding problems. This is still a good method - grinding ear corn and beans together.

Despite our problems, we still had "bean fever" so the next year we put out 5 acres, expecting to harvest them with the grain binder or at least try to. This was fairly successful and certainly a lot better than raking them up and putting them on a stack. We cut the beans when the pods were brown and the stalks still had considerable sap, using the binder only in the morning when the stalks were still tough but not wet. We set the packers as light as we could but it was hard on the packers and tying arrangement. Our chief trouble was with the burly stalks stopping the binder by getting between the slats and canvas. Finally, after using considerable of the "patience of Job" and the "wisdom of Solomon", we got the beans cut and on shocks. Thus we had another curiosity on the farm. Shocks in July were expected but not in October! This required more explaining.

When the shocks were well dried, they were hauled in the barn to finish curing as was the custom at this time with a good portion of the wheat crop. But the crop was still to be threshed. There were still a good many small wheat threshers around that had once been used with the now forgotten horse power. I purchased one of these still in good condition for $25. Then I proceeded to change the pulleys around so as to run the cylinder at a much slower speed than in our previous experience. We removed all the concaves except one which we dropped as low as we could. For the missing concaves, we substituted oak planks. After a little more curing, threshing was accomplished with a five-horsepower gasoline engine.

The results were better than expected. Few beans were cracked or left in the straw. The threshed residue contained quite a lot of leaves, small branches, bean pods, and an occasional bean which made good roughage. Some heifers that we had were fed on this all winter and came through in good condition with nothing else to eat.

We tried several other experimental harvesters but none were quite as good as our own machine. Nothing did as much to expand the acreage grown in soybeans as the coming of the small combine which the farmer could buy and use on his own farm.

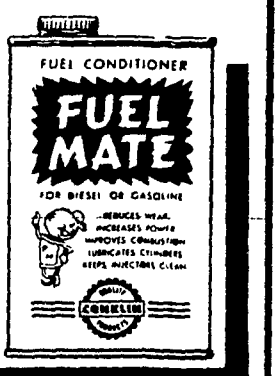
THE AMAZING NEW FUEL CONDITIONER THAT WORKS IN GASOLINE, DIESEL FUEL AND FURNACE OIL.

FUEL MATE



for gasoline, diesel fuel and furnace oil

SCIENTIFICALLY FORMULATED FOR TODAY'S HIGH—COMPRESSION ENGINES...

*Reaches and lubricates points of excessive wear. *Keeps carburetors, diesel injectors, furnace parts clean and operating smoothly for peak performance. *Helps fuel give more power per unit of volume. *More than pays for itself by reducing maintenance and operating expense.

FUEL MATE HELPS BACK UP SPACE—AGE ENGINEERING AND CHEMISTRY...

Gone are the days of large tolerances, crude fuels and heavy oils. Today's close tolerance engines are designed for high speed operation with light oils and highly refined fuels. There is no room for carbon, moisture, gums and sludge if top efficiency is to be maintained. Here's where Fuel Mate comes to the rescue! By using it regularly, these enemies of smooth operation are removed and engines are able to perform as they were designed to perform...providing full service for a maximum length of time.

Use FUEL MATE for cars, trucks, tractors, bulk tanks, industrial equipment, outboards, power mowers, all 2-cycle engines, furnace oil.

Kerstetter expresses concern over national farm problems

HARRISBURG - Pennsylvania's Acting Secretary of Agriculture Raymond J. Keratetter has agreed with most of the 19 resolutions passed by the Pennsylvania State Council of Farm Organizations, which included such items as increased research funds for the production and marketing of farm products, improved animal health care and improved farm tax rates.

Kerstetter, addressing the council at its annual meeting last week at the Embers Restaurant, Carlisle, said he was concerned about national farm problems such as farm income, grain reserves, exports and imports and the like but stressed that "I am not an expert on international agriculture nor do I pretend to be."

He said he wanted to attack "those problems we have at our Pennsylvania doorstep and about which we might have the power to do something useful."

For example, he considered the Clean and Green enabling legislation to be "far from perfect" and urged that it not be treated as an end in itself but only as "a means to help farmers." Kerstetter said this was the spirit in which Governor Shapp signed the bill. The Clean and Green amendment permits farmland to be taxed on its use and productivity rather than on its market value, a principle which the council endorsed in one of its 19 resolutions.

Kerstetter noted the work the department has done in promoting direct marketing from farmers to consumers. "I think direct marketing can help us all," said Kerstetter, "and I should like to hear the comments of this group on our efforts to date on tailgate markets and the proposed structuring of producer to consumer cooperatives."

The acting secretary, who assumed his new post during Farm Show week Jan. 6, reported that the $11 million legislative allocation is being put to use on renovations of the Farm Show complex.

However, he reminded the council that problems with the complex will persist because of its age and flood prone location. He urged the council's committee to continue to press for a new, practical complex. This dovetailed with a council resolution to obtain funding for a new exposition center.

Some other council resolutions that received Kerstetter's backing were:

-The $400,000 maximum in annual harness racing revenues for agricultural research be changed to the specific amount available under a percentage formula.

-An increase in agricultural research funds provided by the legislature.

-The establishment of a mastitis culturing program and facilities under the department's Bureau of Animal Industry that are available to all farmers.

-The allocation of additional funds to permit adequate indemnities on diseased animals; the reinstatement of the statewide calf vaccination program.

Support of the concept that no assessment for sewage lines be levied until land use is changes from its agricultural designation.

Encourage education in waste management.

-Support an appropriate state allocation to develop conservation plans needed to implement the Clean Streams Act.

-Support a study and review of current trespass laws.

-Support research to reduce dust created by farming.

Some resolutions concerned the internal affairs of the council and did not draw comment by Kerstetter.

Kerstetter was not in accord with the council's resolution to support the current Pennsylvania Milk Marketing Law and the structure of the Marketing Board. He noted a value in the call by some dairy cooperatives for a study on pricing powers which have been disruptive for dairy farmers.

He was also not in favor of the council's resolution to support an increase in the number of legislators serving on the Agricultural Research Committee, the body which reviews and selects proposed research projects.

He did not agree with the council's total opposition to the creation of energy parks. Instead, he felt each plan should be considered on a one-to-one basis.

Grangers to hold regional meeting

Grange plans and programs for 1976 will be discussed at a regional conference of Grange leaders which will be held at 7:45 p.m. Saturday, January 31, at Kutztown Grange Hall in Kutztown, Berks County.

Officers and department heads of the Pennsylvania State Grange will meet with masters, lecturers, secretaries and committee chairmen of Subordinate and Pomona Granges in this area. Discussion groups and workshops will feature the evening's program, according to J. Luther Snyder, State Grange master.

In addition to Grange plans and programs, attention also will be focused on problems and legislation affecting agriculture and rural communities, Snyder said. Members of Subordinate and Pomona Granges are welcome to attend the sessions, he added.

The region includes the counties of Berks, Bucks, Chester, Delaware, Lancaster, Lebanon, Lehigh, Montgomery, Northampton and Schuylkill.

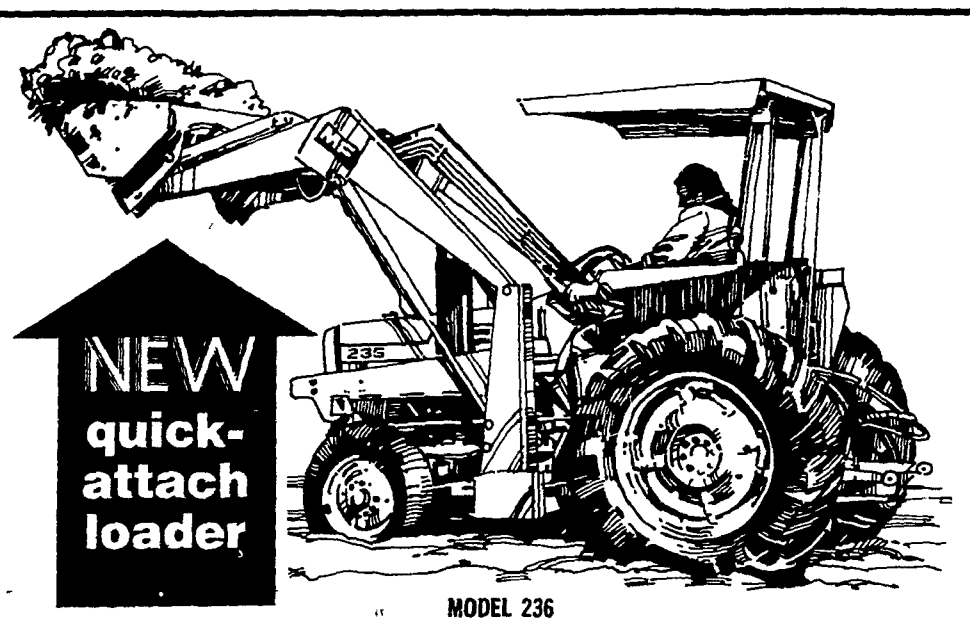
Farm Machinery Rusts Rapidly When Left Out

Extension agricultural engineers at The Pennsylvania State University remind farmers that farm machines rust rapidly when neglected. It is a good practice to treat all equipment with a rust prevention on frictioning parts when the machines are not in use.

Help Keep Pipeline From Freezing

Repairing doors to the pump house and replacing broken window panes helps keep the water pump from freezing on cold nights. A socket for a heat lamp just over the pump is helpful on extremely cold nights when the temperature drops very quickly, reminds N. Henry Wooding, Extension agricultural engineer at The Pennsylvania State University.

NEW quick-attach loader



MODEL 236

handles all your heavy loading & lifting chores.

- Easy-on, easy-off hydraulic mounting
- Lift 2835 lb. to 10'3" height

"Northwestern Adventure" featured at travelogue

The Lititz Rotary club will present the fourth program of the "Travel and Adventure Series in the Warwick High School Auditorium on Saturday, Feb. 7.

Show Time

Dennis Cooper narrating the program "Northwestern Adventure" will appear at 3 and 8 p.m. as previously announced.

But there will be an additional show at 10 a.m. because of the popularity of the speaker.

Dennis Cooper was born in Spokane, Washington. Almost before he could walk, retreated from the city to the lumber camps of his father, the late Senator George R. Cooper. Dennis loved the woods and mountains and his father had to almost drag him off to college where he studied engineering. It looked for awhile like Dennis would abandon his woods career for one in engineering, but he yielded to the call of "the great outdoors" and returned to the mountains of Western Montana, where he and his brother, Don Cooper, ran a logging and sawmill operation for several years.

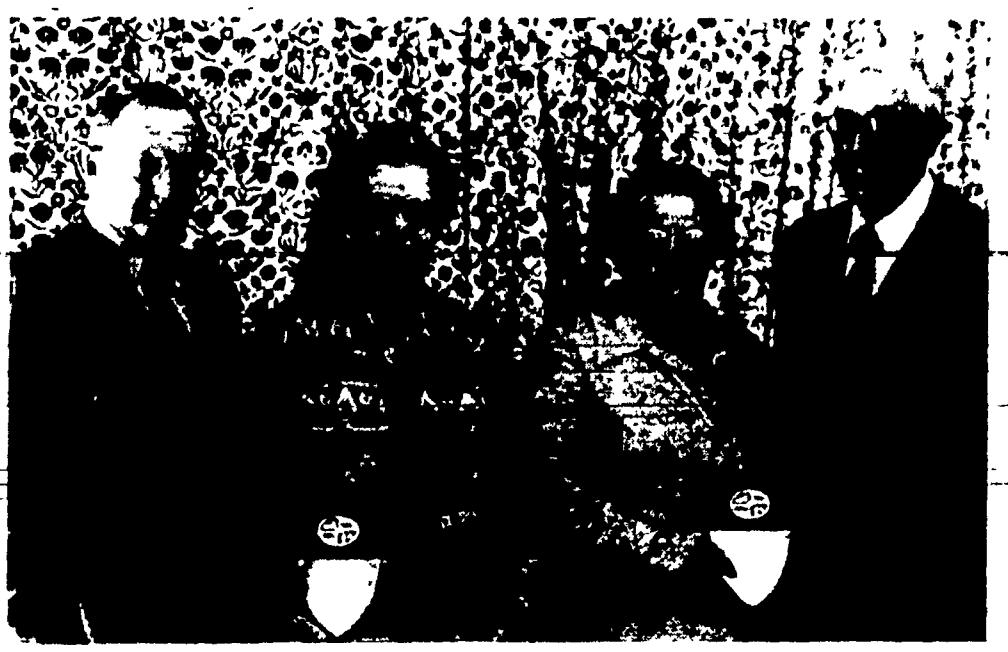
Always interested in photography, Dennis finally decided to photograph his trees rather than saw them. He traded his chain saw for a camera and his logs for film, and, together with brother Don, entered the fascinating world of Travelpgue Photography.

After three years of filming this travelogue, the Cooper Brothers invite everyone aboard for a fun- and fact-filled trip through some of the most spectacular natural beauty in North America. Your "cruise ship" is a shaky little steam boat that huffs and puffs it's uncertain way through a wilderness filled with wild animals, fabulous fishing and white water rivers.

Dennis Cooper

With the home-made steamboat, the trip starts in the high Cascades visiting the "Switzerland" of the United States. The prominent peaks with all their grandeur point to the skies. Dennis takes us to Mt. Ranier, Mt. Baker, Mt. Adams, Mt. St. Helen and Mt. Hood. Everyone knows about Seattle, but Dennis in his own way, shows us the Arboretum, Old Town, Pikes, Market, and the "World's Fair" space needle. By ferry, the trip corsses Lake Washington and the Puget Sound to Olympic National Park with its own range of mountains and the Rain Forests of Olympic Peninsula, the greatest in the world. On to Tacoma and then Olympia with its Capitol buildings. Portland, Oregon has its well known International Rose Gardens. We see them in spring. The old steam boat takes us down the Columbia River Gorge and the Bonneville Dam.

Leaving these two beautiful states, journey goes over to Idaho where Dennis shows us how he and Don built their steamboat. With this boat we travel Idaho's wilderness rivers and see the last log drive on the Clearwater River with 50 million feet of logs en route to the mill. Here wildlife abounds with black bear, grizzley bear, moose, white tail deer, beaver and big horn sheep. One of the cayons not often visited is Hells Canyon on the Snake River plus the Sawtooth Mountain Range and the Idaho side of the Teton Mountains. One of the spectacular scenes in Idaho is Coeur d' Alene and its lake. In the old stramboat they steam up the shadowy St. Joe River, the highest navigable river in North America. Nearby are the hydroelectric dams and an electrified Rocky Mountain Railroad.



Inter-State Milk Producers recently honored, left to right, Robert Jackson and his mother Mrs. Edgar Jackson, and Mr. and Mrs. Robert McSparran for 25-year memberships.

When You Buy Celery

When you buy celery, Extension consumer specialists at The Pennsylvania State University say, make sure it's crisp. It should also be glossy, have a light to medium green stalk with a solid, rigid feel. The leaflets should be fresh and mostly green. Store celery in a cold place as soon as you get it home. To refresh a slightly wilted stalk, put the butt end in water for a few minutes.

105-HORSE PERFORMANCE

TOUGH ACT TO FOLLOW

Meet the new 7000 a 105-hp tractor born into the Allis-Chalmers family with big brother brashness

Climb into its quiet *Acousta* cab—standard equipment! At your fingertips are 12 forward speeds 3 reverse and a park position All with shift-on-the-go convenience of the *7000 Power Shift* transmission And with 9 speeds under 10 mph your most-used range

Then feel the difference this performance-oriented turbocharged diesel can make in your fields 301 cubic-inches of cool-running power to take on any hard day's work with muscle to spare

Learn about the many other extras the 7000 brings you at no extra cost Seeing is believing! Come in now

*Manufacturer's maximum observed PTO horsepower at rated engine speed

NEW! SOW LIMITED™

Lets your sows know when they've had enough

If your sows and gilts had their way, they'd consume too much feed at the early stages of gestation That isn't good for them, or their baby pigs. So, hogmen try to limit consumption by daily feeding of bulk rations or by feeding every other day. Now, thanks to Master Mix® Research, there's a better way to feed gestating sows and gilts. New Sow Limited from Master Mix. Sow Limited is a "self-limiting" feed that lets your sows and gilts eat as much as they want, yet they can still keep in top condition. This new formula is designed especially for confinement operations that use self-feeders. Feeding is more convenient for you and every sow in the house gets her fill without getting out of condition. There are three Sow Limited formulas to meet the changing needs of your sows and gilts — from the start of gestation all the way to farrowing.

See your local Master Mix Dealer for all the details about Sow Limited feeds.

Vocational - educational week slated for Feb. 8-14

February 8-14 has been designated as National Vocational Education Week. It will be observed throughout the country by educational institutions, teachers and students.

John Riddell, Principal of Willow Street Vo-Tech School, stated that the purpose of this national observance is to bring attention to the merits and accomplishments of vocational education.

Mr. Riddell also stated that both young people and adults today face a tremendous task of selecting career development programs. Careful investigation and observation are necessary for the potential student to choose the career training program which will provide the most satisfying and rewarding careers.

The faculty of the Willow Street Vo-Tech School is ready to answer any questions you may have regarding Vocational Education. Come and visit with them at their annual Open House on Thursday, February 12 from 7-9 p.m. This evening is intended for all interested persons to observe our theme of "Reaching Out Through Vocational Education." It will be your chance to see students working in their shops.

In the quest for educational excellence, it should be remembered that everyone has an important stake in the future of education.

What's New . . .

19-Foot Tedder

KMN Modern Farm Equipment, Inc. recently introduced the new 19 Foot Niemeyer Hay Rebel HR 560 Rotary Tedder. Manufacturer states that the HR 560 has a 15 acre-hr. capacity. Four large stars lift and lightly scatter the crop to the rear to enhance curing while saving essential nutrients. A hinged outer frame allows tedder to follow ground contours. A simple hand lever allows operator to adjust for clearing along fences and hedges.

This 900 lb. unit required 30 hp, has 540 rpm maximum PTO speed and has a transport width of 10 ft. Two models are available, the standard HR 560 with fixed wheel forks with a 17-degree spreading angle and the HR 560-V with adjustable wheel forks from 10 - 25 degrees for adaption to different crop conditions.

For more information contact W. Bayersdorfer, General Manager, KMN Modern Farm Equipment, Inc., 12 Sullivan St., Westwood, N.J., 07675. (201) 666-3707

York 4-Her crowing over poultry awards

Roy Thompson, a member of the Thomasville 4-H club in York Co., has something to "crow" about. Capons aren't supposed to crow, but Roy has captured the grand champion award for his capon project twice in one year. In November, Mr. Robert Woodward judged the York Co. 4-H capon round-up and gave Roy's dressed capon a first place ribbon. Roy took another dressed capon to the Pa. Farm Show in January and there it was judged the best dressed capon in the class again.

Roy, the son of Mr. and Mrs. Rodman C. Thompson, East Berlin, has been a 4-H member for five years. Joining 4-H when he was eight, he took over the capon project from his sister Shirely, who had won the National Poultry award in 1972; so he was no newcomer in the poultry field. He has been a consistant winner of the first and second placed dressed capon at every 4-H round-up since he has taken the project.

A member of the seventh grade class at the intermediate school in Spring Grove, Roy carries other 4-H projects such as dairy hanydmay and tractor.

Roy Thompson
York 4-Her

Oil Sewing Machine

Oil a sewing machine with a good grade of sewing machine oil. Mrs. Ruth Ann Wilson, Extension colthing and textiles specialist at The Pennsylvania State University, cautions against using any other type of oil. Place a drop or two in each oil hole according to the instructions that come with the machine. If there is no instruction manual, oil at each point where two metal surfaces rub together. Lubricate the machine at least twice a year - or more often if the machine is used often.

ATTENTION: DAIRYMEN
To save money and improve milk production

Feed Dairy Special 40XX

The key to efficiency in any dairy feeding program is getting maximum performance out of homegrown grains and roughages while keeping out-of-pocket feed costs down. That's why Vigortone developed Dairy Special 40XX for use in legume hay or haylage rations.

This potent pre-mix contains abundant phosphorus to balance off the high calcium content of these roughages and provides proper levels of other major minerals, trace minerals and vitamins.

Legume programs are well balanced with Dairy Special 40XX, and the need for supplemental protein is much less. Best of all, your cows soon respond to their full bred-in potential to produce milk.

Dairy Special 50XX for the dry cow

Proper nutrition for the dry cow is just as important as for the producing cow. It's during this period that the stage is set for the level of production she will have throughout the lactation period. Vigortone's Dairy Special 50XX is properly suited to fortify high roughage rations of dry cows and keep them in excellent condition right up to freshening.

See your Vigortone dealer soon

Your Vigortone dealer has several products and programs to promote better milk production and help you save money. See him soon, or return the coupon below.

Maryland farm family wins Master Award

Hard work, family involvement and specialization are all parts of the reason that the John Kilby family of Colora MD. (Cecil county) won the first Master Farmer award given to a Marylander since 1931.

Every year since 1927, the Master Farmer program has recognized six or more persons from Pennsylvania who are outstanding farmers as well as leaders in their farm organizations and communities. But this year, the sponsors, broadened the program to include farmers from Delaware, New Jersey, and West Virginia as well as Maryland. The six 1976 awards were presented to five Pennsylvanians in addition to Kilbys, Inc. at ceremonies in Harrisburg during the Pennsylvania Farm Show on January 6, 1976.

John Herbert Kilby, Sr. and his sons William Bradley (Bill) and Richard Edward (Rick) who farm as Kilbys, Incorporated, were nominated for the award by the Cecil county Cooperative Extension Service Agent Ray Mueller.

Mueller says, "They really are a team; we first nominated John, but he said the family should receive the award. They are a great family to work with and they are eager to learn new things that will help with their farming operation."

The family enterprize operates a dairy farm with some 290 cows and about 185 heifers of all ages being raised for replacements in the milking herd.

"Bill is in charge of the herd; Richard takes care of the crops, and John fills in wherever he is needed," is the way Edith (Mrs. John) Kilby explains the division of responsibility. The entire program works with a minimum of hired labor - it is mainly a family operation.

In addition to the three full-time male family members, Kilbys, Inc. hires two full-time male employees and part-time high school boys or girls as needed. Emily Kilby, an unmarried daughter, also does relief milking, and Phyllis, Bill's wife, raises the calves. Richard is not married.

That's the family involvement, and it hints at the hard work that has made the corporation a success. In addition to the 270 acres in the main farm, Mt. Pleasant, another 230 or so acres of rented land grows feed for the dairy herd. That's the specialization; every acre's production goes toward producing milk.

John Kilby bought Mt. Pleasant in 1961 when a housing development and a golf course surrounded his former farm on Wheel Road, Bel Air (Harford county) and pushed him out of farming there. With two sons in college and two in high school, he felt he needed to expand the size of his farming operation.

Standing in the doorway of her newly-modernized kitchen in the antebellum brick farmhouse, Edith Kilby traced the long history of Mt. Pleasant from the time Lord Baltimore granted the land to Amos Ewing whose grandfather had come to this country from Scotland in 1725. Amos Ewing passed the farm on to his son, Amos Ewing, Jr., who had no children to inherit the land. He sold it to a cousin, George Steel, who left it to his widow and two daughters. It appears that these good ladies were not cut out for the rural life so they moved to Philadelphia and left the farm to a long succession of tenants.

When the farm belonged to one George Cox, federal revenue agents raided "the largest still ever found in these parts" on the property. The farm then passed to the partnership of William Simpson and William Alt who made it into a pony ranch. The Kilbys had to remodel some of the existing pony barns into dairy cattle stalls and a milking parlor when they moved there.

The remodeling was not such a big job at that time since the entire herd consisted of 25 cows. When he put in his first milking parlor, John increased the herd to 40 cows. By 1970 it was becoming obvious that the family would be able to handle a much bigger operation.

The oldest son, John, Jr., was employed by Southern States Farmer Cooperative and the second son, Robert, after a stint in the military, had returned to the farm for a while. He is now a pilot in the Air National Guard and farms part-time on his own farm. The youngest daughter, Edith Ann Webb, is married to a farmer who farms on his own.

But with Bill, Richard and Emily all still at home, the corporation was formed and the milking parlor and loose housing was planned for 300 cows. The basic AgPro system was modified by University of Maryland agricultural engineers working with the local Extension office and Mueller.

The corporation bought several herds that were being dispersed and added individual cows and first-calf heifers as they could locate them. The Kilbys began to upgrade the herd by good management and rigorous culling until they now have a rolling herd average of 17,163 pounds of milk with 3.5 percent and 601 pounds of butterfat per year, according to Maryland Dairy Herd Improvement Corporation records.

Bill explains that the cows are fed according to production - within limits. The cows are assigned - according to production or stage of lactation - to one of six groups. Only two groups receive hay (alfalfa) and they get on the average about six pounds per cow per day in addition to grain and silage. These two groups are the very high producers and the dry cows (close springers) that are about two weeks away from freshening. The other four groups receive grain - again according to production - and a mixture of corn silage and grass silage. The proportion of corn to grass silage varies from one-third corn silage to two-thirds corn silage depending on the group.

The herd is bred artifically the first service and again the second service when necessary. If the cow does not settle on the second service she is turned to the bull for a final chance to conceive. Bull calves are sold as "monkey" calves at a few days of age. The female calves go into the heifer barn where they are fed whole milk for four to six weeks. By that time they are also on grain and hay which they receive free choice to three months of age. They then go on limited grain and hay which they receive free choice until they are about a year old when they are turned to pasture until they begin to "udder up." They are then brought into the milking herd and begin the routine of going through the milking parlor twice a day.

One of John's greatest concerns about their present operation is that government regulations will force a change in waste handling procedures. At present, all solid wastes are flushed from milking parlor and loafing ares - and the slatted-floor calf-pens - into a lagoon. This material is pumped through a separator which takes most of the solid material out of the liquid.

The solid manure, is loaded on trucks and sold to an organic plant food company in nearby Oxford, Pennsylvania. This waste material alone returns nearly $12,000 every month to the farm. The 20,000 gallons of water used each day to flush the floors goes back into a second lagoon for further settling before it goes into a third lagoon where it is clear enough for pumping through the irrigation system to crop land.

But while all this farming was making Mr. Pleasant a going concern financially, the Kilbys were not neglecting their community obligations. John was a member of the Emmorton Grange since 1944 and served as president. He joined the Calvert Grange in 1962 and was elected vice president of that organization. He was also president of the local Farmers Club and a director of the Farm Bureau. Bill is continuing this interest in Farm Bureau and along with his wife Phyllis became leaders in the state Farm Bureau young farmers program. Bill is president of the Cecil County Farm Bureau and a director of the State Farm Bureau and the Cecil County fair.

Richard works with youth board of Cecil Soil Conservation District and on special conservation projects such as Earth Day, exhibits at county fair and planting trees in a state park.

John became a member of the Maryland Artificial Breeding Cooperative in 1950 and has served that organization as director; he has also been a director of the Federal Land Bank. He was chosen Cecil County's Outstanding Farmer for the year 1969. He is a Deacon in the West Nottingham Church.

And through it all he is supported by his wife Edith who wrote on the Master Farmer worksheet, "In addition to this sketch, I would like to give John credit for his patience with animals and people, his directness in sticking to his goals, his honesty and humbleness. He has helped many boys beside our own to find a place in life and won their respect."

If you visit the Kilby family at Colora, you will find this same willingness in each one of them to give credit to the others in the corporation

It is hard work and specialization - but most of all family involvement that makes Kilby's Inc. the Master Farmers of Maryland.

Make Farm Machinery Repairs Soon

Winter is an ideal time for farmers to work in their farm shops, say Extension agricultural engineers at The Pennsylvania State University. Repairs account for a large portion of the total machinery cost. Work that can be done to keep repair costs down means more profit in the farming business. It also helps reduce frustration and time lost during the busy planting, culvitating, and harvesting seasons ahead.

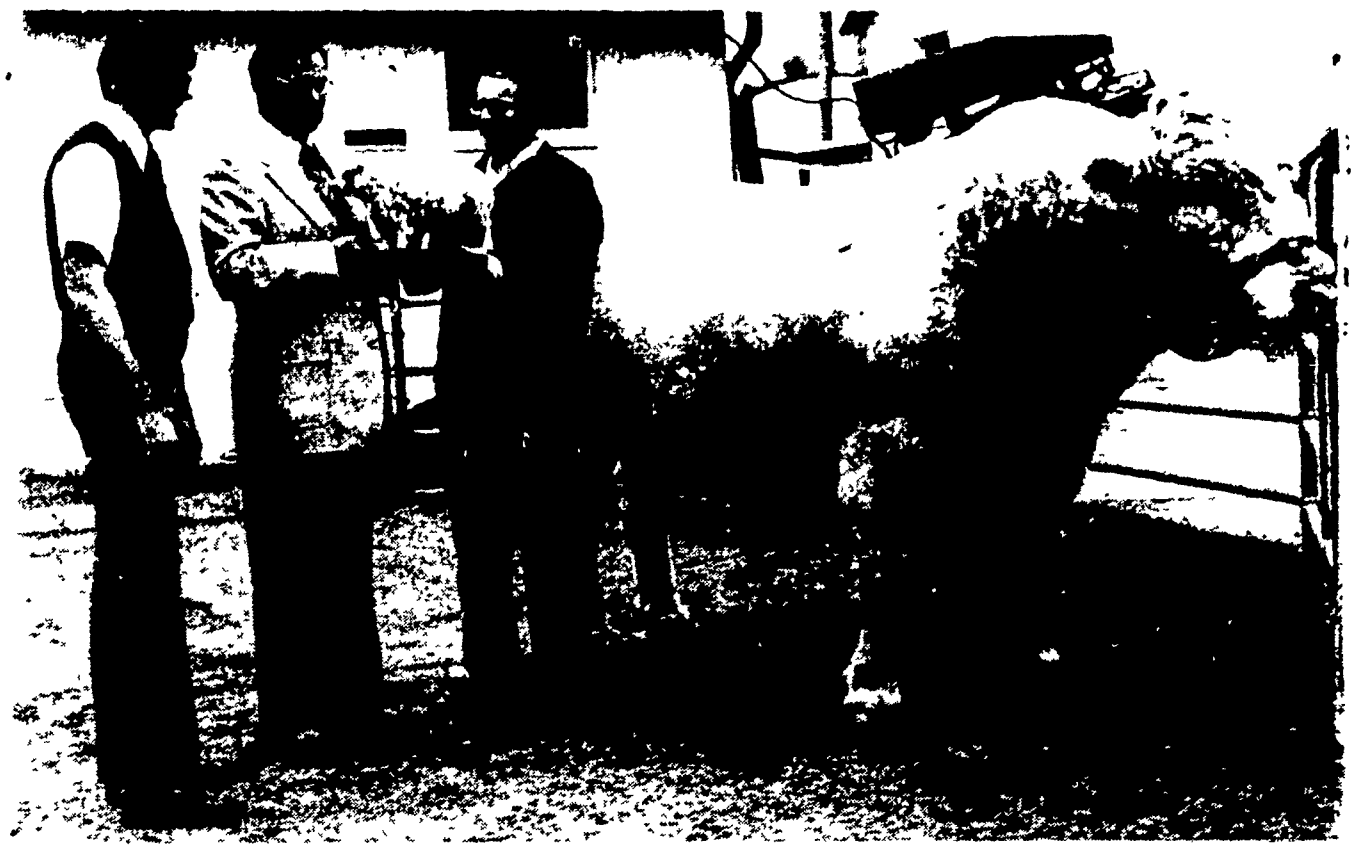
Breeding researchers honored



Replicas of an outstanding Charolais bull were presented recently to Penn State doctoral candidate Kent A. Barber, left, of Fleming, and Dr. John O. Almquist, center, in charge of the Dairy Breeding Research Center at University Park. The replicas honored the two men for research in identifying Charolais bulls of superior growth and reproductive capacity. David Seamans of State College, right, presented the models for the Pennsylvania Charolais Association, the Colonial Charolais Association, and the American-International Charolais Association — groups supplying animals and partial financial support. The replicas are scale models of Mr. Penn State, right, one of the bulls in the study. The sculptor was Amelia Romaniec of Pine Grove Mills.

Dress for Snowmobiling

Dress for snowmobiling by wearing plenty of warm clothing because this sport doesn't offer much physical exercise. Extension specialists at The Pennsylvania State University advise snowmobilers to be particularly careful of the feet. Keep feet from freezing by wearing two pairs of socks and lined boots. Other essentials are warm mittens, thermal underware, woolen shirts and wind-resistant outerwear.

SPERRY NEW HOLLAND
Tank Spreaders
keep your barn area tidy, the roadway clean and your neighbors happy.

Egg marketing news explained

LANCASTER — The Pennsylvania Egg Marketing Association met here at the Sheraton Motor Lodge a week ago with Bob White, of USDA's Egg Marketing News Service as the guest speaker. While White's speech was the highlight of the evening, there were some other interesting presentations. It was revealed, for example, that Howard Helmer's omelet making record actually stands at 248 in one hour — not 247 as had previously been reported. The original count was reportedly erroneous. Helmer set the new record at the Farm Show earlier this month in what the egg industry calls "one of the most extensive egg promotional efforts ever to make the news." The performance was carried by wire services across the country and it is rumored that NBC news carried a short tape of it. A total of 96 pounds of liquid eggs were used in making the 248 omelets, which were fed to livestock afterwards. Farm Show precautions and regulations prohibited serving the omelets to the public, even though they were definitely fit for human consumption.

White, who has been with USDA for 14 years, and has headed the Philadelphia office for nine, gave an extensive report on how the market news service operates. Excerpts of his talk follow:

Poultry Market News is a government service providing unbiased and accurate information on trading of poultry and eggs. The service distributes price and market information on supply and demand which is gathered by skilled reporters employed by the United States Department of Agriculture and by cooperating state agencies. The information is provided to farmers, producers, processors, merchandisers, and others in the poultry industry as an aid in marketing and future planning. Market News is under the supervision of USDA's Agricultural Marketing Service.

Information on poultry and eggs is gathered anywhere business is done: on the farm, at country assembling plants, shipping points, terminal markets and also from distributors, wholesalers and buyers. The professionally trained market news reporter talks with buyers and sellers, checks negotiations and supply-demand conditions. Then he analyzes and evaluates the facts and releases this information through his market news office.

Market news offices are located in major producing areas and terminal markets and comprise a nationwide network. Connected by leased teletypewriter lines, these offices exchange information within minutes and comparisons are quickly made between markets on prices and trading conditions.

The information assembled covers selling prices of poultry, eggs and dairy products and includes statistics on movement and supply of these items in all markets.

In addition, the market news reporters analyze data and trends on trading activities, demand, price averages, and quality ranges in order to comment on general marketing conditions for poultry products. Poultry Market reports cover the following commodities:

Eggs: Shell, Frozen and Dried Eggs.

Poultry: Broilers, Turkeys, Ducks, Fowl, Roasters, Squabs, and Rabbits in the California area.

Market News is distributed by: Telephone, Mailed Reports, Daily and Weekly Newspapers, Radio and Television, Trade Papers, Press Associations.

Detailed market news reports are mailed free on request from market news offices throughout the country.

Poultry Market News has 23 federal and state offices staffed by 47 reporters (27 federal and 20 state). A staff of 23 clerks (20 federal and three state) also work for Market News.

There are 47 different egg reports released each week. Some of them may be daily while others only once a week.

They go out over 23,000 miles of leased wire service.

One of the oldest statistical reports is the Commercial Egg Movement Report which, at present, has about 300 cooperators nationally. Most of the cooperators handle over 1,000 cases of eggs a week with 500 the minimum. This report represents over 1,500,000 cases each week. A newer report and more current report is the Weekly Egg Inventory Report. Information for this report is collected by phone on Monday morning in 22 states from 248 contacts. These contacts are generally the larger handlers of eggs in the different areas of the country. Inventories generally range from 400 to 500 thousand cases of eggs a week, occasionally higher or lower. The report is divided into five sections; Mid-Atlantic, New England, North Central, South Atlantic and Pacific. New England is reported by itself due to the brown egg influence in the area. The report gives a breakdown of sizes as compared to the previous week by either more or less. A percentage change, plus or minus, with the previous week is given for each of the five areas as well as the total country.

Market news receives at its offices approximately 1,660 phone calls a month for egg information.

The egg report is mailed Tuesday and Friday. The poultry reports are put out on Monday, Wednesday and Friday. A separate turkey report is printed and mailed from the National Statistical Office in Kansas City on Friday.

A National Weekly Egg and Poultry Review is released weekly on Thursday from Newark.

Monthly, a Cold Storage Report is released around the middle of the month covering storage stocks of Poultry, Eggs and Dairy products on hand as of the previous months ending. Also on this report can be found the previous month's average wholesale prices for commodities reported in New York and Philadelphia.

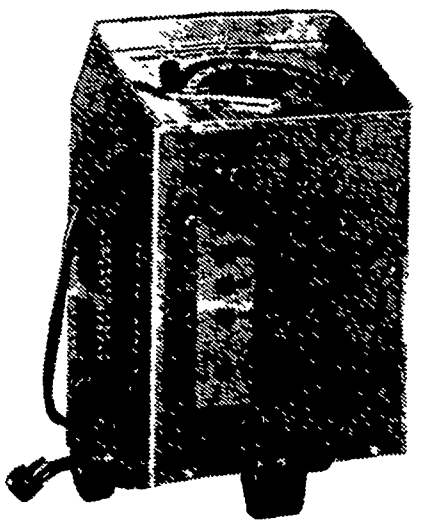
AGWAY

You're invited to a FREE WELDING CLINIC!

Here's a rare opportunity . . . a chance for farmers and others to learn how to save valuable time and money by doing their own welding.

With improved new Twentieth Century equipment, it's easy. We'll demonstrate it. Then we'll let you try your hand You'll see how easily you can do a multitude of repair jobs with a versatile new Twentieth Century heavy-duty welder. Remember, it's the handy, low-cost welder with these *8 exclusive features* . . .



1 Three welders in one.

2 A new 400 AMP cutting ground for faster and cleaner cutting, piercing and gouging.

3 Overhead and vertical welding easy as flat welding. Saves time.

4 Spot welding without attachements, with settings built in, for faster, stronger welds.

5 Soldering, also without attachments, with settings built in, for faster soldering without surface preparation.

6 Heavier construction — more copper and sturdier electrical steel protect against voltage loss, let you weld better, strike and hold an arc easier.

7 You get a "continuous welding" service guarantee — five years on parts, labor and repairs; twenty years on labor and repairs.

8 Battery charging with an inexpensive attachement for fast and slow charging of 6, 8, 12 and 24 volt batteries.

WE'LL TAKE YOUR PRESENT WELDER IN TRADE!

Lancaster to host poultrymen

Lancaster County, the largest poultry county in Pennsylvania, has been selected as the site for two major poultry events in 1976. William Carlin, president of the Pennsylvania Poultry Federation, announced that the Federation's Annual Fund Raising Banquet will be held at the Host Farm, Lancaster, on April 1, 1976, and the Annual Pennsylvania Poultry Conference will be held at the Host Corral, Lancaster, on June 17, 1976. These two events annually attract poultrymen from the entire state of Pennsylvania as well as a few bordering states.

The Annual Fund Raising Banquet is a gala evening affair that features appearances by well-known personalities, a stage show from New York City, a social hour accented with flowers for the ladies, a seven piece orchestra for dining and dancing, special entrees for dinner and surprise gifts for selected attendees. The large annual industry social will be held in the spacious Cabaret Room of the Host Farm. Tickets are being sold by 55 industrymen throughout the state. Co-chairmen for the event are two well known names in the poultry industry, Dale M. Weaver of Victor F. Weaver, Inc., and Kenneth Longacre of Horace W. Longacre, Inc.

The Annual Pennsylvania Poultry Conference is a full day of educational meetings concluding with an awards banquet in the evening. The early summer conference brings together distinguished experts on topical issues with Pennsylvania poultrymen. The evening banquet is highlighted by the announcement of the "Poultryman of the Year" and "Allied Industryman of the Year," two coveted honors for Pennsylvania industrymen.

Mr. Carlin commented that it is only natural that the two major activities for Pennsylvania poultrymen should be held in the center of the poultry industry during the Bicentennial Year. Mr. Carlin predicted record attendance for both events and invited everyone to "Come to the Cabaret" on April 1, 1976. For further information or tickets, contact the Pennsylvania Poultry Federation, 3807 Paxton Street, Harrisburg, PA 17111.

Potato stocks down

Potatoes in storage on January 1 in Pennsylvania are estimated at 2,450,000 cwt. -26 percent lower than a year earlier. This represents 36 percent of the State's revised 1975 fall potato production estimate. Stocks at this time last year amounted to 45 percent of the 1974 production. Disappearance since harvest equals 4,365,000 cwt. of which 1,100,000 cwt. took place during December. U.S. January 1 Fall Potato Stocks Down 6 per cent

Stocks of potatoes for all uses held in storage by growers, local dealers and processors in the fall production areas totaled 152.9 million cwt. on January 1, 1976. This is 10.0 million cwt. (6 percent) less than the record 162.9 million cwt. on hand a year earlier but 19.3 million more than on hand January 1, 1974.

January 1 stocks in the eight eastern States totaled 25.2 million cwt., down 28 percent from the 35.2 million cwt. on hand a year earlier.

Md. land use law explained

COLLEGE PARK, Md. — In calling attention to a new piece of land use legislation now before the Maryland General Assembly, Dr. Frank Bentz, Jr., University of Maryland vice president for Agricultural Affairs and Legislative Relations, said that the current rapid disappearance of prime agricultural land into urban and suburban uses should be a matter of great concern to all Maryland citizens.

"Although farmers are most directly concerned, all people of the state need to understand the implications of this trend on the future of the state," he said.

To help citizens understand this proposed legislation entitled Preservation of Agricultural Land, Bentz said that the University's Cooperative Extension Service has prepared a question-and-answer explanation of the bill (copy attached). The question-and-answer document is available from local Extension agents in each of Maryland's counties.

"This effort by the University is purely educational," Bentz said. "It does not necessarily reflect an endorsement of the Agricultural Land Preservation Bill, but is an attempt to get the people of the state informed about, and involved in, the land use issue."

Designated as House Bill 783, the legislation was prefiled for introduction during the opening session of the Maryland General Assembly in Annapolis on Jan. 14.

Vegetable gardening course offered

Longwood Gardens still has room for home gardeners in its spring vegetable course. Lectures will be held on Thursdays for six consecutive weeks, from February 12 through March 18. Two sections of the course are offered, one meeting from 9:30 to 11:00 a.m., the other from 7:30 to 9:00 p.m.

Mr. David Foresman, instructor in Longwood's Department of Education, will discuss soil conditioning, vegetable variety selection, planting, fertilizing and pest control.

Registration for this course is $10.00 and will close on February 4. Name, address, telephone number and registration fee should be sent as soon as possible to the Department of Education, Longwood Gardens, Kennett Square, PA. 19348. Please indicate your preference for the morning or evening section of the course.

MINERAL SUPPLEMENTS

who needs them? You do!

Quality roughage alone can provide much of the protein and energy needed for milk production. But since roughages may lack both balance and quantity of minerals necessary for maximum milk production, bone and muscle development, and the most efficient utilization of other nutrients—many dairymen need a mineral supplement program.

How can you tell if you need a mineral supplement program?

Let us make a free analysis of your forage crops. We'll give you a report on the nutrient value of your hay, silage, or other roughages, along with recommendations for any supplements—if necessary. **We won't try to sell you anything you don't need!**

Our three mineral mixes—Beacon Phos-Min, Beacon Mineral Ade and Beacon Cal-Min—are formulated by highly respected dairy nutrition specialists. The supplement they recommend will contain the necessary minerals to make up deficiencies or imbalance in your roughages and to achieve the proper calcium-phosphorus ratio in your total feeding program.

You can rest assured that you aren't paying extra for exotic ingredients, high transportation cost, and expensive promotion and sales cost.

With BEACON, you get more mineral units per dollar invested.

Mineral supplements, formulated especially for the cow at reasonable cost, are part of what we call "No nonsense feeding".

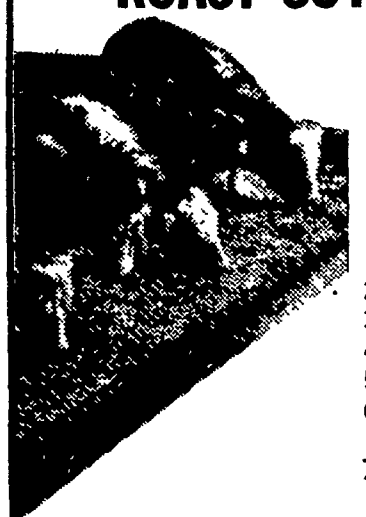
ROAST SOYBEANS ON YOUR FARM



For peak feeding value have your soybeans roasted. (To kill toxic enzymes in raw soybeans.)

Plus These Additional Benefits:

1. Roasted soybean (not just cooked), increased digestibility by 15 percent.
2. Increased weight gain for beef & hogs.
3. Increased butterfat in milk & egg production.
4. Improved animal health, reduced vet bill.
5. Eliminates hauling to the mill & back to farm.
6. Feed your own grown grain. (Not exchanged with others)
7. Beans remain whole. Store for months without losing any feeding value.

Manheim FFA team wins engine contest

Seven vocational agriculture departments participated in the Lancaster County Small Gasoline Engine Contest which was held recently at Manheim Central High School.

Final team placings for the day were: Manheim Central - 1st; with 288.5 points, New Holland - 2nd with 252, Penn Manor 226, followed by Elizabethtown, Ephrata, Solanco and Pequea Valley. High Individuals were Darryl Wenger 144.5, Manheim Central; Jay Gainer 144, Manheim Central; Dan Witwer 132.5, New Holland; Gary Snader 119.5, New Holland; and Larry Charles 114 of Penn Manor.

Each contestant was quizzed in the areas of general information on engines, tools, and measurements. They had to show their competence and understanding of Parts and Service Manuals and of the Briggs and Stratton Repair Instructions IV.

The major portion of the contest was based on knowledge and engine operation. Each engine was bugged before the contest. The team had to find the bugs, make corrections, start the engines, and adjust the engine for the proper RPM's within 50 minutes. This year's winning time was 31 minutes and 15 seconds.

The teams from Manheim Central, New Holland, and Penn Manor will be going to the state Small Gasoline Engine Contest. It will be held during FFA Activities Week at The Pennsylvania State University during June.

Grain stocks high

WASHINGTON - As of Jan. 1, all feed grain stocks in the U.S. are up 138 million metric tons - an increase of 21 per cent over the preceding year. Broken down, the increase goes like this: Corn, 4.4 billion bushels on hand - up 22 per cent from a year ago. Sorghum grain is up 25 per cent from a year ago with 476 million bushels stored away . That figure, however, is 26 percent below the Jan. 1, 1974 levels. Oats is down by one per cent compared to a year ago, with 501 million bushels stashed away in the nation's bins. Barley stocks are at around 277 million bushels, down by one per cent from last year.

Soybean production from 1974 and 1975 harvests has left the country's bean facilities fuller than ever before. With 1.25 billion bushels on hand, the amount is 26 per cent greater than last year's stockpile. All wheat, at 1.4 billion bushels, is up by 25 per cent from a year ago; 49 per cent above Jan. 1, 1974 levels. But it's below what we had in storage during the first three years of the seventees.

York Fair received funds

HARRISBURG - Pennsylvania Secretary of Agriculture Raymond J. Kerstetter recently presented a check of $42,600 to representatives of the York Interstate Fair.

The presentation was made at the annual convention of the Pennsylvania State Association of County Fairs being held at the Host Inn here.

The York Fair, perhaps the oldest in Pennsylvania, received the money to cover premiums paid in 1975 to people who displayed exhibits and purses paid to horsemen. Kerstetter noted that the fair drew crowds of more than 350,000 people in 1975, "which is certainly indicative of a very successful season."

Kerstetter, in an address at the convention, reported that to date $1,337,000 has been paid to Pennsylvania fairs to cover the costs of events, exhibits and premiums. This represents 90 percent of the funds applied for by the fairs. The remaining ten percent, or about $432,000, will be paid after completion of an annual audit.

Grants paid by the department's Fair Fund are derived from harness and horse racing proceeds.

In addition to these funds, a certain number of fairs each year can receive matching funds for capital improvements. Kerstetter reported that for 1975, a total of $540,604 was paid in matching funds to 49 fairs.

Overall, said Kerstetter, fairs will receive about $281,000 in payments for 1975 over the previous year.

"We attribute this to two things," said Kerstetter, "the increase due to change of legislation and also the revised edition of the state premium guidelines book. This book enabled many of the smaller fairs to have more of a variety of items to receive premiums."

Plant disease It's trouble with a capital "T"
That's why Funk's has charged more than 100 corn pathologists, agronomists, biologists, chemists, entomologists and scores of crop specialists with one single mission develop the strongest corn hybrids that will resist diseases and stresses to produce record-high yields.
And their efforts have paid off, too
For Funk's has continued to set high yield records in growing contests across the country
Well, that's the past.
Today and tomorrow, Funk's is committing a greater investment than ever before to hybrid research.
Because we think that old saying still holds true.
An ounce of prevention is worth a pound of cure.

Herbicide booklet printed

GREENSBORO, N.C. — A new publication entitled "Herbicides in Your Community" produced by the Agricultural Division of Ciba-Geigy Corporation explains what happens to the firm's herbicides in the environment and the rationale behind chemical weed control in urban areas.

The booklet is available to all persons who need to have a ready piece of information to distribute on the subject.

"The booklet points out the benefits of using herbicides, such as eliminating fire hazards caused by dense weed growth," says Pete Nicas, industrial herbicide sales manager for Ciba-Geigy. "It also states that chemical weed control is much more economical and effective than mechanical means."

EPA safety requirements, how weeds are killed, and how triazine herbicides break down in the soil are outlined. A profile of each Ciba-Geigy herbicide is given stating where each may be used, at what rates, the length of weed control and toxicology information.

For copies of the brochure request CGA 500-001 from Ms. Betsy Wood, Ciba-Geigy Corporation, Agricultural Division, P. O. Box 11422, Greensboro, NC 27409.

xxx

Techniques for diagnosing fetal defects can help save lives, reports The National Foundation - March of Dimes. In a 1974 MOD survey of some 2,000 women who sought prenatal diagnosis, more than 97 per cent were assured that their children would be born without the defect tested for.

xxx

What do cat feces and raw meat have in common? Both can pass an organism called toxoplasmosis to the pregnant mother, says The National Foundation - March of Dimes. The result may be birth defects. Expectant mothers should avoid handling litter boxes or eating undercooked meat.

Reader's Corner

Making Soybean milk

Editor's note: The following article was authored by Moses Chu of Paradise, Pa. Chu is quite familiar with the use of soybeans and has offered his advice on making soybean milk and curd for a protein source.

Many people believe that over eating red meats and dairy products can lead to the risk of high levels of cholesterol. This excessive cholesterol has often been linked to increasing the incidence of heart disease, especially for those people over 50 and for younger people who are overweight. Improving the diet seems to be an urgent matter but what other sources of protein are to be considered? The answer for some has been soybeans.

Soybeans are hard to digest in their native state but the milk and curd from them have been used for a protein source. Making the curd and milk is relatively simple if you follow instructions suggested.

Objects needed include a dish and food grinder along with two pieces of cloth one 18 x 18 inches and the other 28 x 28 inches.

Take two pounds of soybeans (free from stones and gravel) and soak the beans in water for at least eight hours. Drain the water. The beans should now weigh about five pounds. Grind the beans and repeat to get them very fine. Place ½ gallon of water in a pot. Mix well and squeeze the milk out of the beans using the larger cloth as a strainer. Bring milk to boiling point. Serve the milk following boiling or cooled.

For soybean curd put four - five tablespoonsful of vinegar into the milk and stir gently. Put the smaller cloth over a dish and pour milk into it. Drain water which contains vinegar, wrap up the curd and press. Curd will be ready in a few minutes. The whole process takes about 1 hour.

From two pounds of beans you can easily get one pound of curd.

Do not throw any of the residue away as it can be used for soil conditioning and fertilizer. Further information can be obtained by calling 717-687-8751.

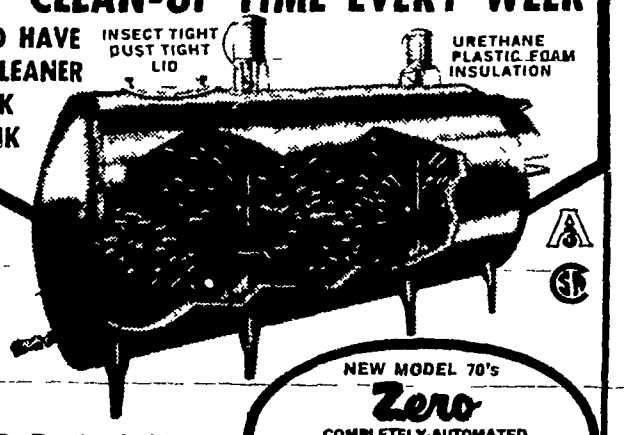
AND HAVE A CLEANER BULK TANK



. . . By Trading in Your Present Tank on a New Model "Seventies" ZERO!

NEW MODEL 70's
Zero
COMPLETELY-AUTOMATED VACUUM AND NON-VACUUM
BULK MILK COOLERS
—WITH BUILT IN SPATTER-SPRAY AUTOMATIC WASHER

If you need a new, larger bulk milk tank — investigate the new Model "Seventies" ZERO! For it's the only farm bulk milk tank on the market today that has a completely-automated, built-in, "push-button" self-cleaning and sanitizing system. Other bulk milk tank manufacturers have copied ZERO's round design and vacuum. But there's still no bulk tank cleaning system that cleans as thoroughly as ZERO's patented, built-in SPATTER-SPRAY Automatic Washer.

See above how the Spatter-Spray's propellers hurl a cross-fire of detergent solution — with "tornado" force — against the tank's entire, stainless steel interior for thorough cleaning that's necessary for high-quality milk. Official records show bacteria averages have been greatly reduced. Standard capacities, 100 through 6000 gallons. Has dust-tight, insect-tight lids. And many more advantages.

Health clinics announced

The Feb. schedule of free blood pressure clinics sponsored by the American Heart Association, Lancaster, Pennsylvania Chapter was announced recently. These free blood pressure testings are provided by your HEART FUND dollars and will be provided at the following locations and times:

Lung Association, 630 Janet Avenue, Lancaster - 10 a.m. to noon and 1 p.m. to 5 p.m. - The first Tuesday of the month.

Willow Pharmacy, Willow Street - 1 p.m. to 3 p.m. the first Tuesday of the month; 6 p.m. to 9 p.m. the third Tuesday of the month.

Sloan's Pharmacy, 61 E. Main Street, Mt. Joy - Tuesday and Wednesday of each week from 2 to 4 p.m.

American Heart Association, Lancaster, Pennsylvania Chapter - 246 W. Orange Street, Every Friday from 2 to 4 p.m.

Pharmacy Labs, 335 W. King Street, Lancaster - Every Monday through Friday from 8:30 to 4:30 p.m.

McElroy's Pharmacy, 100 E. King Street, Lancaster - Every Wednesday from 1 to 4 p.m. and every Friday evening from 7 to 8:30 p.m.

Lancaster Community Health Center, 545 Pershing Avenue, Lancaster - Every Monday from 1 to 4 p.m. and every third Saturday from 1 to 4 p.m.

Strasburg Pharmacy, 1 W. Main Street, Strasburg - Monday, Tuesday, Thursday and Friday from 9 a.m. to 9 p.m.; Wednesday and Saturday from 9 a.m. to 6 p.m.

All testing at these centers are FREE of charge and are supported by your HEART FUND dollars.

Pesticide applicator exams scheduled

Luke Antonelli, Regional Director of the Pennsylvania Department of Agriculture, announced today that examinations will be administered for prospective commercial applicators of restricted-use pesticides. He explained that under the new Pesticide Act it will be illegal after October 1976 for anyone not licensed by the Commonwealth of Pennsylvania to sell, purchase, or apply certain pesticides. All commercial applicators must pass a certification examination to become licensed. Mr. Antonelli further explained that under the new law, a commercial applicator is anyone who applies or supervises the application of a restricted-use pesticide for any purpose to property other than his own. A person applying a restricted-use pesticide where it can come in contact with the public (such as a golf course or cemetery) or where food is involved (such as a warehouse or feed mill) is considered to be a commercial applicator, whether he or she owns the property or not.

Frank Stearns, Regional Supervisor of the Bureau of Plant Industry, which will enforce the Pesticide Act, stated that examinations are offered in ten categories of pesticide application. He said half of the exam concerns a general knowledge of pests, pest control, and labeling. The remainder involves the specific categories in which the applicant desires to be certified as a commercial applicator. Mr. Stearns urged those intending to take the examination to obtain study materials provided by The Pennsylvania State University. Application forms for acquiring these materials are available from the county agent at the Penn State Agricultural Extension office in each county. These are usually listed in the telephone directory under "Penna. State University - Agricultural and Home Economics Extension."

Anyone wishing to take the examination is asked to contact by phone or writing the Pennsylvania Department of Agriculture, Bureau of Plant Industry, 402 Century Plaza Building, Lansdale, PA 19446, telephone number 215-368-3000, for registration and information concerning the exam location.

Ayrshire herd classified

The registered Ayrshire dairy herd of Milton M. Brubaker, Spruce Villa Farm, Lititz, Penn. was recently classified for type by Donald S. Benson, official inspector of the Ayrshire Breeders' Association.

The herd has an average score of .837 and consists of 21 Very Good, 20 Good Plus, 4 Good and 2 Fair cows.

One of the advantages of this program is that it serves to inform the dairyman of the faults and desirable traits in body conformation.

Dairy bill over-ride

NEW CUMBERLAND — Dr. Weldon Barton, aide to Congressman Joe Vigorito (D. 24th District, Pa.) told a meeting of the Pennsylvania Farmers Union, here, last Tuesday that the dairy bill proposing an 85 per cent parity rate with quarterly adjustments is very likely to be vetoed by President Ford before the end of the week. He must do something with it by midnight, Friday, he said.

However, the veto has at least a "50-50" chance of being over-ridden, Barton added. Assuming Ford does veto the bill (by the time this is off the press, he will have taken action on it), then it will go back to the Senate for reconsideration.

According to Barton, who is firmly involved in the House Committee on Agriculture, and considers his superior, congressman Vigorito, to be in a "position of leadership" in agricultural committees, the bill stands a "real chance" of being confirmed again in the Senate, where it was introduced.

"The Senate must override the President's veto first," he explained, "and this is good because we have a better chance there and if passed it would increase chances for an override in the House." He noted that urban votes must be picked up in the House to meet the required two-thirds majority for an override of a Presidential veto.

In other comments made at the two-day convention of the Pennsylvania Farmers Union, Barton said he expects to see no major farm legislation during 1976. Present agricultural acts are still in effect and won't be up for renewal until next year.

What is on the agenda, however, is a review of current policies regarding food stamps and grain inspections.

Geese

Geese are generally marketed young because weight gained after the first 11 weeks is mostly fat Chilled or frozen ready-to-cook geese usually weigh from 6 to 12 pounds

2010 PIONEER OF FARM BULK MILK COOLER

York COUNTY DHIA MONTHLY REPORT

997 lbs. of Butterfat and 23,888 lbs. of milk was produced by Jewel, a 6 year old registered Holstein owned by Sinking Springs, R5, York to top the list. Margie also owned by Sinking Spring was second high at 3 years of age producing 19,945 and 841 lbs. of butterfat.

The high herd was Sinking Spring Farm with 45.2 lbs. of milk and 1.84 lbs. of fat on 70.1 cows. Second high was Beshore Farms, New Cumberland with 48.3 lbs. of milk and 1.81 lbs. of butter on 46.2 cows.

York County DHIA electes offivers

Richard Smyser, R1, York was elected President of York County Dairy Herd Improvement Assoc. Larry Amspacher, R7, York was elected Vice President and Leo Rutter, Lightner Road, York was elected secretary. Officers were elected at the Directors meeting who as well as the above included: Joe Hushon, Delta; George Knight, Airville; Charles Rauhauser, Dover; Robert May, New Freedom; Rodman Thompson, East Berlin; and Donald Fantom, Delta.

Broken Bit 4-H meets

A recent meeting of the Broken Bit 4-H Horse and Pony Club was held at the home of John Farrington, at Lower Hopewell Horse Center.

Natalie Immel; was elected president, vice president will be Brian Immel, secretary will again be Dee Dee Rice, treasurer will be Daphne Immel, news reporter and scrapbook will be Leslie Sherman, and game leaders will be Alida Farrington and Kevin Keifer. The meeting was then adjourned and a mini-clinic was given by the trainer at Lower Hopewell Horse Center, Jim Clark.

Label Frozen Foods

When putting any food in the freezer—foods you buy or freeze from your garden—always label each package. Tell what's inside, how it's prepared, how much is in the package and the date it was packaged. Keep a record of all frozen food, check off packages as you use them. Always use the oldest packages first

Machinery manufacturers reveal survey

Even bigger equipment expected

TARPON SPRINGS, Fla. - More crop acres, more grain exports and higher farm cash receipts will help increase 1976 U.S. retail sales dollar volume of farm equipment by seven per cent, manufacturers said in response to the Farm and Industrial Equipment Institute (FIEI) State of the Industry survey presented here last week.

In delivering the report, Don L. Douglass, vice president, marketing, Massey-Ferguson Inc., told the FIEI Marketing and Management Conference of 200 top industry executives that makers of agri-equipment (grain bins, portable farm augers, and farmstead equipment) expect U.S. retail sales to increase by eight per cent in 1976.

Internationally, farm equipment manufacturers estimate an increase in 1975 sales of three major product areas: tractors will be up 26 percent over 1974, combines up 15 percent and hay equipment up 10 percent.

"Roughly 70 percent of all companies polled are more optimistic about 1976 business prospects than they were last May," Douglass said (The FIEI State of the Industry survey is presented each January and May.)

Some other reasons for their buoyed outlook: increased livestock feeding, improved financial position of customers, and strong demand for larger, more efficient equipment.

Manufacturers anticipate unit sales of four wheel drive tractors will increase to 11,000 units in 1976, up 10 percent from 10,000 units sold in 1975 (estimated). Two wheel drive tractor unit sales will decrease to 144,500 units, down 3.0 percent from 148,000 sold in 1975 (estimated). Self-propelled combine unit sales will decrease to 32,000, down 1.8 percent from 32,000 sold in 1975 (estimated).

Big package hay handling equipment unit sales will rise 12.5 percent in 1976. Hay stacker sales will be up seven percent and stack mover sales will increase by eight percent.

The trend toward larger equipment will continue, manufacturers say. One-half of all farm tractors sold in 1970 were 70 horsepower and in 1975, 85 h.p., In 1980, manufacturers expect the median horsepower to be 101 h.p. and by 1985, 117 h.p., the report says.

By 1985, manufacturers expect the largest two wheel drive tractor commercially available to offer 219 h.p.; the largest four wheel drive tractor will offer 565 h.p.- Currently, the top commercial two wheel drive tractor offers 182 h.p.; the most powerful four wheel drive tractor offers 290 h.p., according to FIEI.

Harvesting capacity will also increase dramatically, manufacturers say. In self-propelled combines, it will be up 20 percent by 1980 and 25 percent by 1985. Manufacturers said that the harvesting capacity of their largest combine increased 20 percent since 1970.

"We also note a trend toward conservation tillage," Mr. Douglass said. "Respondents said moldboard plow sales would decrease by five per cent, while chisel plow sales would be up five per cent."

Energy shortages will increase manufacturing costs in 1976, 84 percent of the respondents said. But overall, 63 percent expect inflation to run about the same level as in 1975.

Material and component supplies appear adequate for 68 percent of the respondents, but the remainder said certain tires, forgings, castings and gears were in short supply.

"Except for combines and large tractors, inventories on November 1, 1975, were higher than manufacturers had previously reported as acceptable," Mr. Douglass said. "However, most reported that inventory on January 1, 1976, or some time during this year would be acceptable. Manufacturers do not feel they have an inventory problem."

Manufacturers believe that the five year Russian grain agreement will have a stabilizing effect on prices, but of itself would create no significant upside pressure on commodity prices.

Farm machinery sales would be supported somewhat by the agreement, some companies said, because farmers will gear up to produce for a larger export market.

Retail sale dollar volume of the following agri-equipment product lines is expected to increase 10 percent: portable farm augers and elevators, crop dryers, dairy, beef and hog mechanization equipment, and grain bins.

Milking machine retail sale dollar volume will increase by nine per cent, manufacturers say. Broiler production equipment sales will increase by five per cent while egg production equipment sales will remain flat.

Consumer chemical application equipment (sprayers, dusters, foggers, etc.) sales will be up six percent the report said.

Some positive factors include strong commodity markets, world food demand and improved return on investment for farmers.

Dollar volume of U.S. lawn and garden equipment sales will increase 10 percent, respondents said.

They cited the following positive factors as reasons: general economic recovery, housing recovery, higher consumer incomes, more leisure time, and the still growing interest in vegetable gardening.

Guernsey recognized

PETERBOROUGH, N.H. - Two registered Guernsey cows in the herd of Penn-Del Farm, Raymond F. & Louise A. Witmer have recently completed top official DHIR actual production records, according to The American Guernsey Cattle Club. All cows were milked two times a day. The testing was supervised by Pennsylvania State University, University Park.

Guernsey milk is world famous for its high protein, delicious flavor and golden yellow color.

Penn Del Charming Nettie, a Sr. three year old, produced 13,000 pounds of milk and 629 pounds of fat, in 305 days, and Penn Del Fayvors Beatrice, a Jr. two year old, produced 12,540 pounds of milk and 564 pounds of fat, in 305 days.

hogs that look healthy can lose more money than one like this:

The respiratory complex is a major cause of "hidden" disease losses Hogs may appear healthy, but many can be fighting off disease and losing efficiency.

Pneumonia is a key factor in the respiratory disease complex But it's often brought on by atrophic rhinitis Atrophic rhinitis is an infection in the hog's snout By damaging the air passageway — which normally filters out dust and bacteria — atrophic rhinitis opens the door for pneumonia

Tylan Plus Sulfa is the only feed additive cleared for both atrophic rhinitis and pneumonia It has proved its ability to treat pneumonia, and to maintain weight gains and feed efficiency in the presence of atrophic rhinitis That's why we recommend it

For additional information on Tylan Plus Sulfa

Saddle-up Club meets

On January 15, the monthly meeting of the Saddle-Up Horse and Pony Club was held at the Shrewsbury Borough Building. The club voted to write to the Senate and ask them to vote for House Bill 216. On March 6, there will be a Spring Fling at Bair. It will be from 10 til 9 at night. There will be workshops on judging. There are four new members this month who's names are as follows: Dania Garrison, Karen Lake, Stephanie Ikes, and Colleen Howard.

PURINA RESEARCH TEST PROVES

TEST COW CHOW

WITH EXTRA ENERGY

MAKES MORE MILK

GRAY SUMMIT RESEARCH FARM TEST RESULTS

	Lbs. Milk - 305 Day Lactation
COWS FED TEST COW	16,958 Lbs.
SAME COWS PREVIOUS LACTATION FED REGULAR MILKING RATION	14,891 Lbs.
IMPROVEMENT WITH TEST COW	2,067 Lbs.

FEED TEST COW TO YOUR HIGH PRODUCING COWS

★ "Steam Up" 14 days before freshening with "Test Cow" Milking Ration

★ When your cows freshen - Challenge Feed with "Test Cow" Milking Ration.

★ To insure maximum milk production - follow Purina's Dry Cow program starting 60 days before freshening.

★ If you wish to feed a cob chop mix to lower producing cows, cows can be switched over when production drops below 50 lbs. milk per day.

ADVANTAGES:

1. "Test Cow" is specially formulated to meet the needs of your high producing cows.
2. "Test Cow" is Purina's Best Milking Ration - highest energy and low fiber.
3. Available at different protein levels to fit your roughage program.
4. Maximum milk production insures best income over feed cost.
